TRAFFIC ACCIDENT FACTS

ANNUAL REPORT

Prepared By
HIGHWAY SAFETY DIVISION
NEBRASKA DEPARTMENT OF ROADS

KAY A. ORR
Governor

G. C. STROBEL
Director-State Engineer

Nebraska
Department of Roads

Kay A. Orr

July 1, 1988

G. C. Strobel

Dear Reader,

The Highway Safety Division of the Nebraska Department of Roads is responsible for keeping records on all reportable motor vehicle accidents that occur within the State. They then analyze this data to determine accident trends and problems as they relate to motor vehicle safety. Annually, the Highway Safety Division publishes this report, *"Traffic Accident Facts,"* to provide an overview of the State's traffic accident data for the previous year.

The information needed for the accident records system is provided by law enforcement officers of local, county and state agencies. Their contributions are essential, and we thank them for their diligence and cooperation.

We hope that this booklet may provide some insight into traffic accident problems and the losses that occur as a result of motor vehicle accidents. Public awareness of these problems is a first step toward improving our driving experience.

Respectfully,

Kay A. Orr
Governor

G. C. Strobel
Director - State Engineer

TABLE OF CONTENTS

	Page No.
Definitions	1
Part I - Overview	
Death Rate per 100 Million Vehicle Miles	3
Ten Year Trend in Fatal Accidents	3
All Accidents by Type	4
Geographic Summary of Deaths by County	5
Accident Data by County	6, 7
Part II - 1987 Data	
Summary - Number of Accidents	9
First Harmful Event in All and Fatal Accidents	10, 11
Road Surface Condition in All and Fatal Accidents	12
Type of Roadway in All and Fatal Accidents	13, 14
Day of Week	15
Time of Day	15
All and Fatal Accidents by Month	16
Driver Age and Age of Casualities	17
Injury Severity by Restraint Usage	18
Motorcycle Fatalities by Injury Type	19
Driver Age and Sex	20
Vehicle Body Styles in All and Fatal Accidents	21, 22
Intersection Accidents	23
Non-Intersection Accidents	24
Alcohol Involvement in PDO, Injury and Fatal Accidents	25
Driver Age and Alcohol Involvement	26
Contributing Circumstances	27
Part III - Trends	
Pedestrian and Pedalcycle Accidents	29
Animal Accidents	30
Railroad Accidents	30
Passenger Cars in All Accidents	31
Vehicle Body Style in All Accidents	31

The data contained in this booklet is based on **REPORTABLE ACCIDENTS ONLY** as defined below. Definitions of various accident categories are also provided.

DEFINITIONS

Reportable Accident ..... An accident which involves death, injury, or property damage in excess of $500.00 to the property of any one person.

All Accidents ..... The total number of reportable motor vehicle accidents including fatal, injury or property damage.

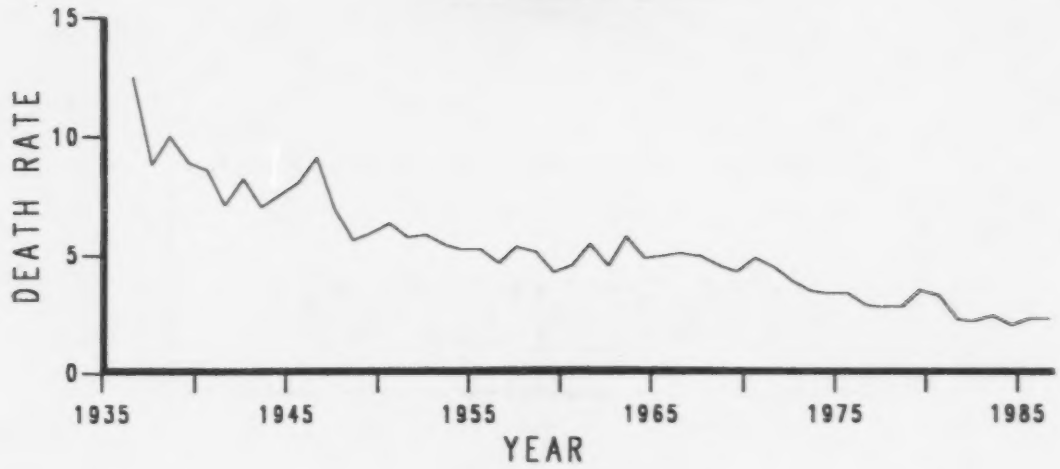
Fatal Accident ..... Motor vehicle accident that results in fatal injuries to one or more persons.

Injury Accident ..... Motor vehicle accident that results in injuries, other than fatal, to one or more persons.

Property Damage Accident (PDO) ..... Motor vehicle accident in which there is no injury to any person, but only damage to a motor vehicle, or to other property, including injury to domestic animals.

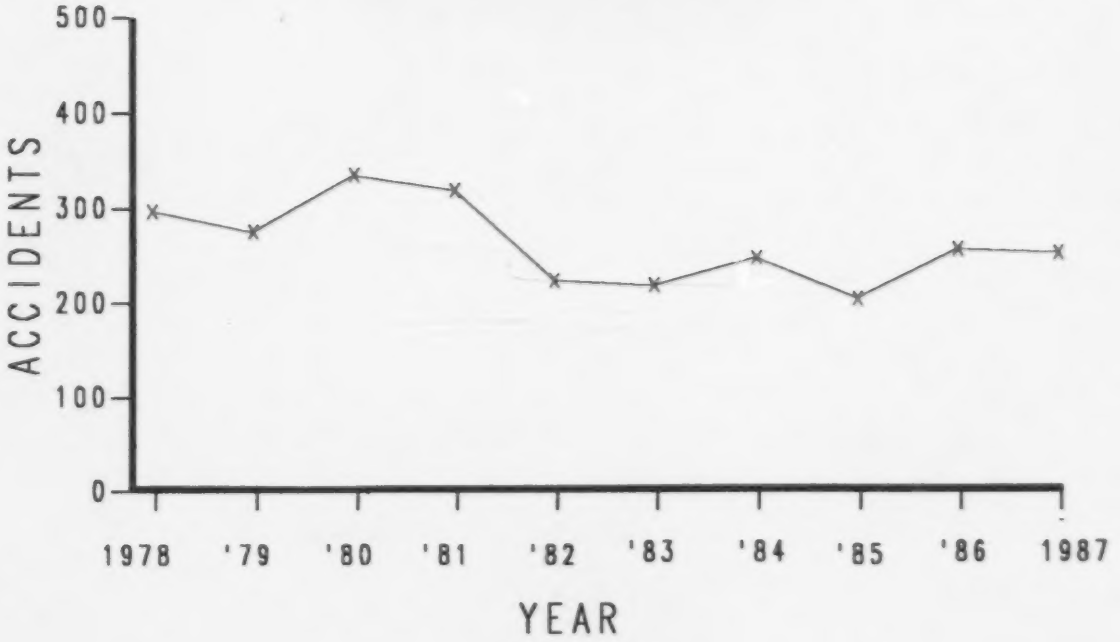
PART I
OVERVIEW

DEATH RATE PER 100 MILLION VEHICLE MILES (1937-1987)



(FIGURE 1)

TEN YEAR TREND IN FATAL ACCIDENTS



(FIGURE 2)

ALL ACCIDENTS IN NEBRASKA
1987

(FIGURE 3)

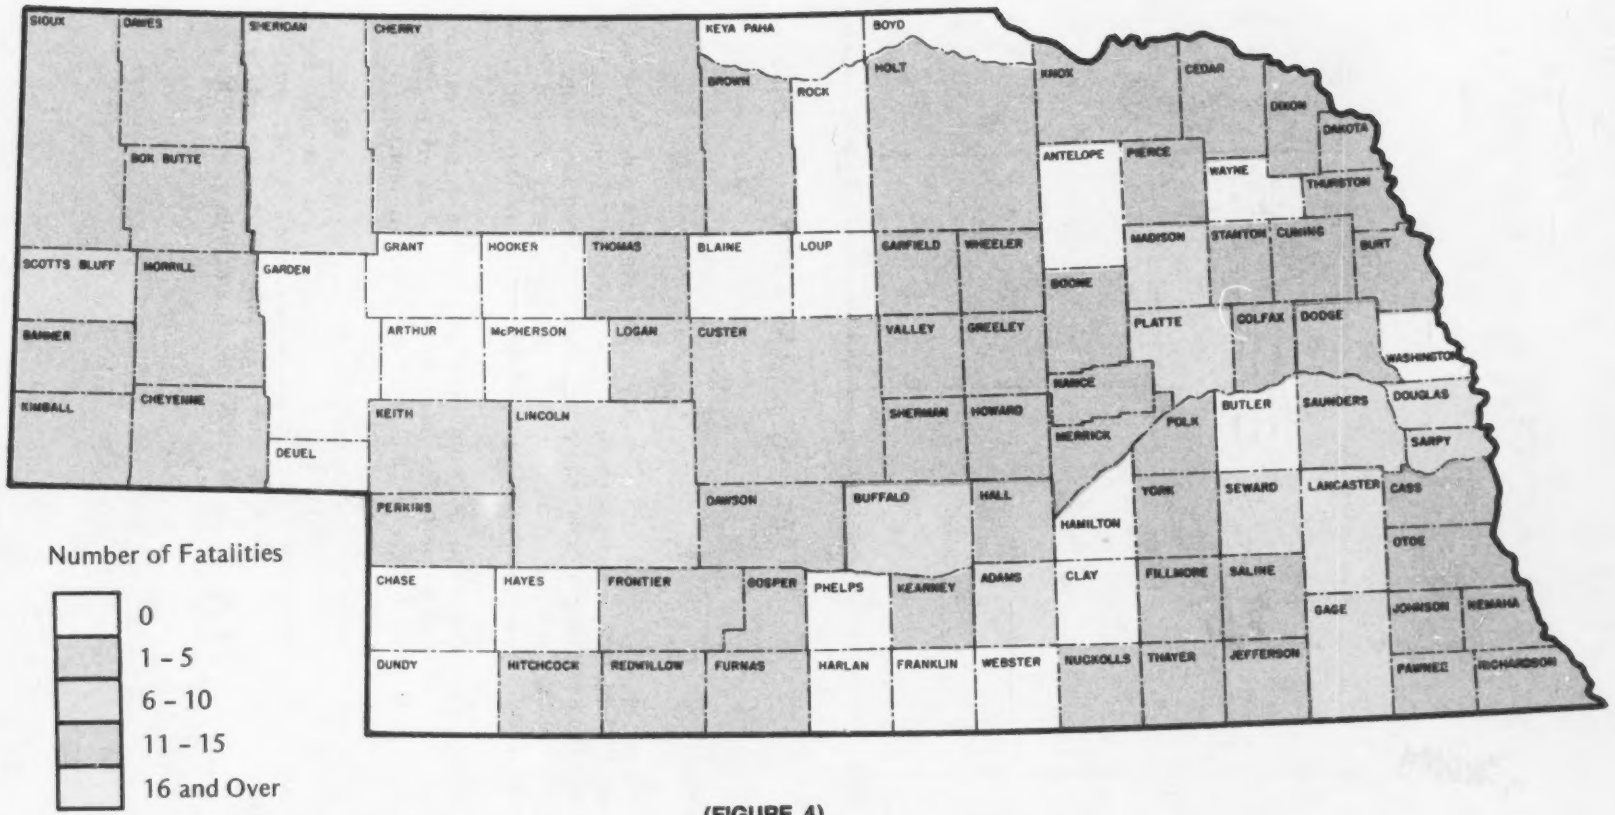
The number of persons killed per 100 million vehicle miles traveled in Nebraska, from 1937 to 1987, is represented in Figure 1 (Page 3). Even though the death rate fluctuates from year to year, there has been a general downward trend. Much of this reduction can be attributed to improvements in vehicle design, roadway engineering, specific safety programs, enforcement and improved driver awareness.

Figure 2 (Page 3) depicts the number of fatal accidents per year for the last ten years. In 1987, there were 255 fatal accidents, compared to 259 in 1986. This represents a slight decrease (-1.5%) from the previous year.

Fatal accidents make up only a small portion of the total accidents in Nebraska. Property damage only (PDO) accidents make up the majority. Figure 3, above, shows the percentage distribution of all accident types. In 1987, there were 255 fatal accidents, 14,567 injury accidents and 23,248 property damage only (PDO) accidents. Fatal accidents made up .7% of all accidents, and injury and PDO accidents made up 38.3% and 61.1%, respectively.

1987
GEOGRAPHIC SUMMARY
OF TRAFFIC FATALITIES BY COUNTY

TOTAL TRAFFIC FATALITIES - 297



(FIGURE 4)

Douglas County, which contains Omaha, the state's largest city, had the highest number of traffic fatalities with **48**, followed by Lancaster County with **18**, and Dodge County with **13**. Twenty-four counties experienced no fatalities in 1987.

PART II
1987 DATA

NUMBER OF TRAFFIC ACCIDENTS

ALL ACCIDENTS	38,070
PROPERTY DAMAGE ONLY (PDO)	23,248
INJURY ACCIDENTS	14,567
PERSONS INJURED	*21,917*
FATAL ACCIDENTS	255
FATALITIES	*297*

NUMBER OF REGISTERED VEHICLES IN NEBRASKA	1,497,409
NUMBER OF REGISTERED DRIVERS IN NEBRASKA	1,084,761
*NUMBER OF VEHICLES IN ACCIDENTS	68,430
*NUMBER OF DRIVERS IN ACCIDENTS	63,541

**THERE MAY BE MORE THAN ONE VEHICLE OR DRIVER INVOLVED IN A SINGLE ACCIDENT. PARKED, DRIVERLESS VEHICLES ARE INCLUDED.*

DURING 1987:

ONE ACCIDENT OCCURRED EVERY 14 MINUTES

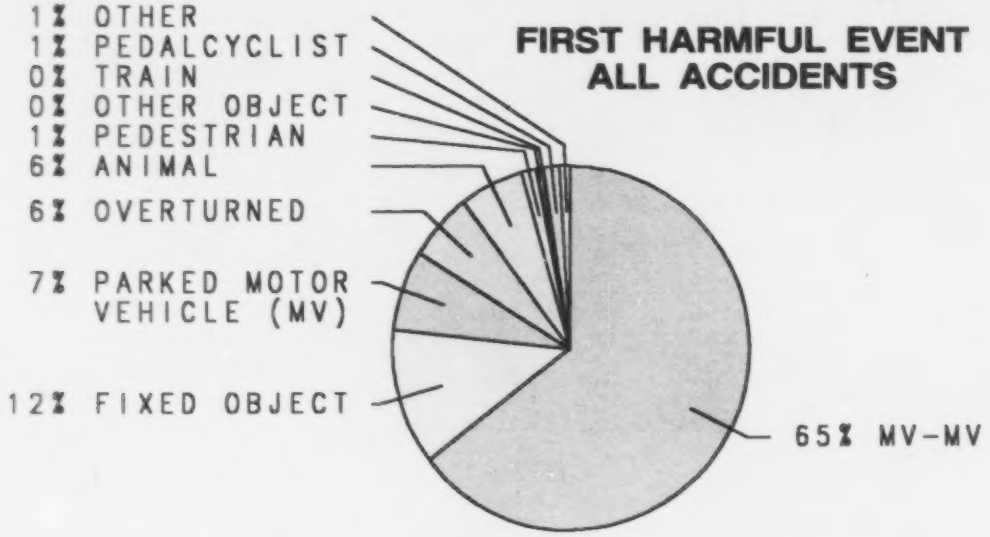
60 PERSONS WERE INJURED EACH DAY

ONE PERSON WAS KILLED EVERY 29 HOURS

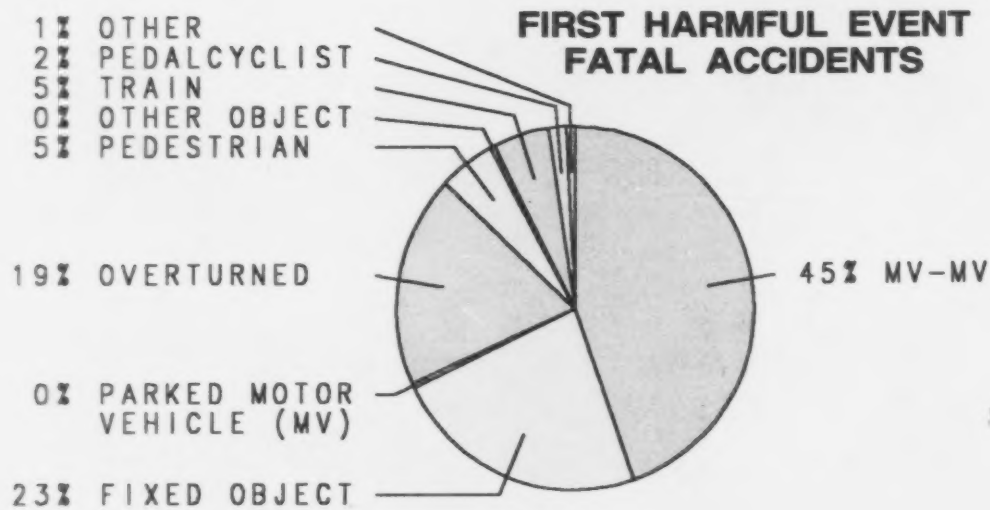
*THE ECONOMIC LOSS IN TERMS OF DOLLARS WAS $255,720,400.00

**ECONOMIC LOSS FIGURES ARE DERIVED FROM THE NATIONAL SAFETY COUNCIL BULLETIN, ESTIMATING THE COST OF ACCIDENTS, 1986. COST COMPONENTS MEASURED ARE: REPAIR COSTS TO VEHICLES AND PEOPLE, AND LOSSES IN PRODUCTION AND ABILITY TO PRODUCE.*

First harmful event (FHE) is the initial incident that causes injury or damage. It is sometimes referred to as "type of accident" and implies a collision with each of the objects listed in the following charts. "Overturned" and "other" accidents refer to accidents where no collision is involved (e.g., a car loses control and overturns, a car catches on fire).



(FIGURE 5)



(FIGURE 6)

First harmful events for all accidents and for fatal accidents are shown in Figures 5 and 6. In both types of accidents, collisions between two or more moving vehicles (MV-MV) make up the majority of accidents. Accidents involving fixed objects, vehicles overturning, pedestrians and trains tend to be more severe, as indicated by their overrepresentation in fatal accidents as compared to all accidents. *(Note: Due to rounding, the total percentages do not equal 100% in Figures 5 and 6. There were no fatal traffic accidents involving animals in 1987.)*

The following table provides the numbers of accidents in each category listed in Figures 5 and 6 on the previous page.

1987

FIRST HARMFUL EVENT		THIS YEAR								
		ACCIDENTS				PERSONS KILLED AND INJURED				
		TOTAL	FATAL	INJURY	** PDO	KILLED	NON-FATAL INJURIES			
							TOTAL	A *	B *	C *

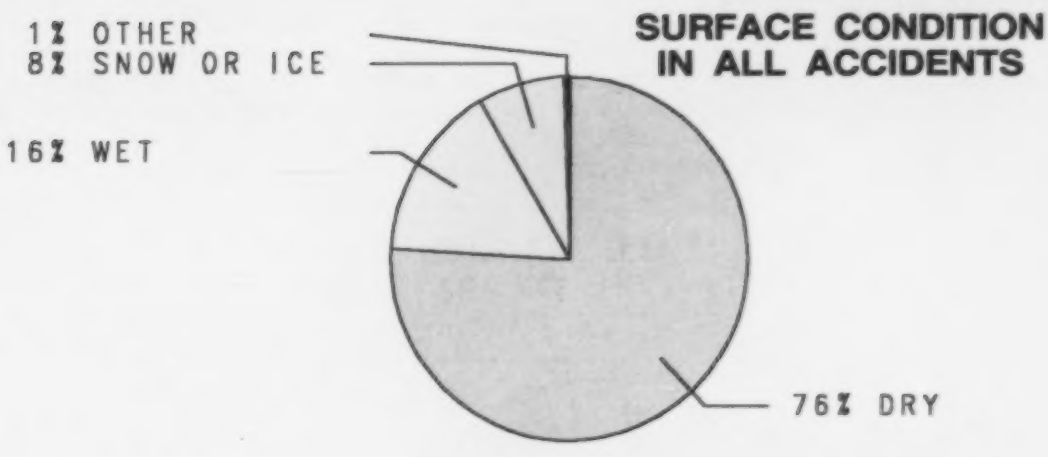
Other noncollisions		311	3	149	159	3	170	29	120	21
– TOTALS –		36796	259	13508	23029	290	19818	1838	11807	6173

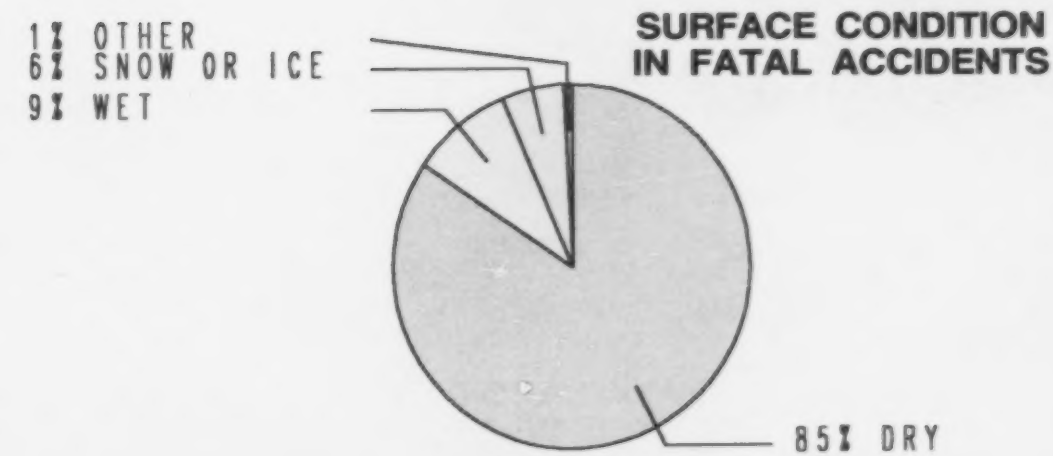
(TABLE 2)

Table 2 provides 1986 data for comparison to 1987.

In 1987, there was a 1.5% decrease in fatal accidents as compared to 1986, but there was a 2.4% increase in deaths resulting from these accidents. Both injury accidents and injuries increased, up 7.8% and 10.6%, respectively. The number of PDO accidents increased slightly from 23,029 in 1986 to 23,248 in 1987.



(FIGURE 7)



(FIGURE 8)

The condition of the road surface plays an important role in motor vehicle accidents. Slick road conditions are generally more hazardous than dry conditions, but drivers tend to compensate for this by being more cautious. Fewer fatal accidents actually occur under slick road surface conditions than under dry road conditions. *(Note: Due to rounding, the percentage totals in Figures 7 and 8 exceed 100%.)*

The following table provides the number of accidents in each category.

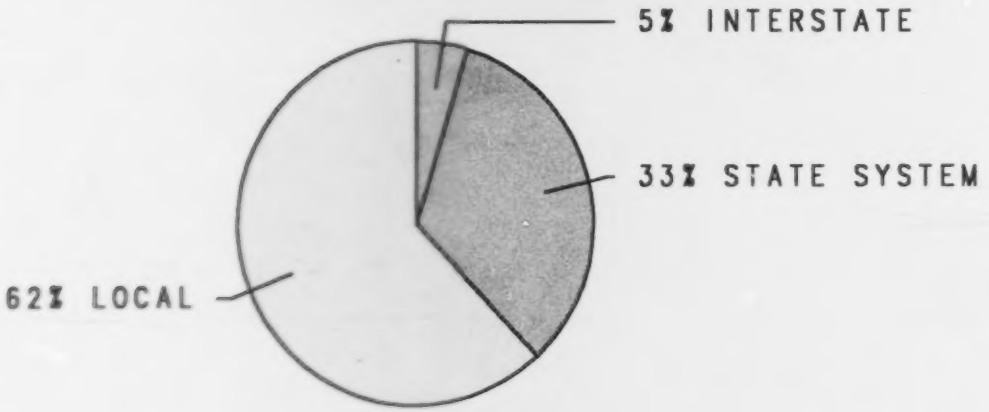
ROAD SURFACE CONDITION	TOTAL	FATAL	INJURY	PDO
Dry	28679	214	11316	17149
Wet	5886	23	2273	3590
Snowy or icy	2974	14	809	2151
Other	210	2	67	141
Not stated	321	2	102	217
– TOTALS –	38070	255	14567	23248

(TABLE 3)

TYPE OF ROADWAY

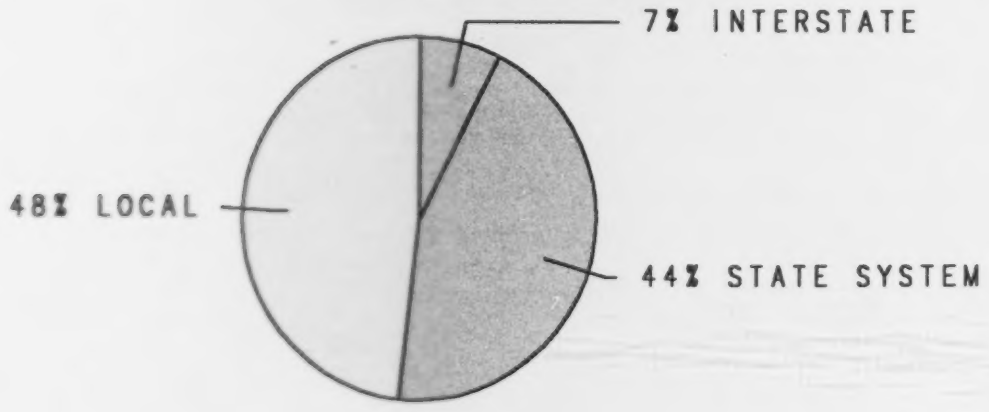
The distributions of all accidents and fatal accidents, by roadway type, are shown in Figures 9 and 10. Table 4 shows the actual number of accidents and casualties by roadway type. The percent of fatal accidents that occur on the interstate and on state highways is larger than the percent of all accidents that occur on the interstate and on state highways. Accidents on interstates and state highways tend to occur at higher speeds; this accounts somewhat for the increased severity of these accidents. *(Note: Due to rounding, the total percentages in Figure 10 do not equal 100%.)*

ALL ACCIDENTS BY TYPE OF ROADWAY



(FIGURE 9)

FATAL ACCIDENTS BY TYPE OF ROADWAY



(FIGURE 10)

ROADWAY		ACCIDENTS				PERSONS	
		TOTAL	FATAL	INJURY	PDO	KILLED	INJURED
URBAN	Interstate	824	7	342	475	7	488
URBAN	Other State System Highways	7835	27	3219	4589	32	4935
URBAN	Local Roads and Streets	18641	37	6973	11631	42	9836
URBAN							
URBAN	URBAN SUBTOTAL	27300	71	10534	16695	81	15259
RURAL	Interstate	951	12	326	613	15	550
RURAL	Other State System Highways	4852	86	1642	3124	104	2887
RURAL	Local Roads and Streets	4967	86	2065	2816	97	3221
RURAL							
RURAL	RURAL SUBTOTAL	10770	184	4033	6553	216	6658
– TOTALS –		38070	255	14567	23248	297	21917

(TABLE 4)

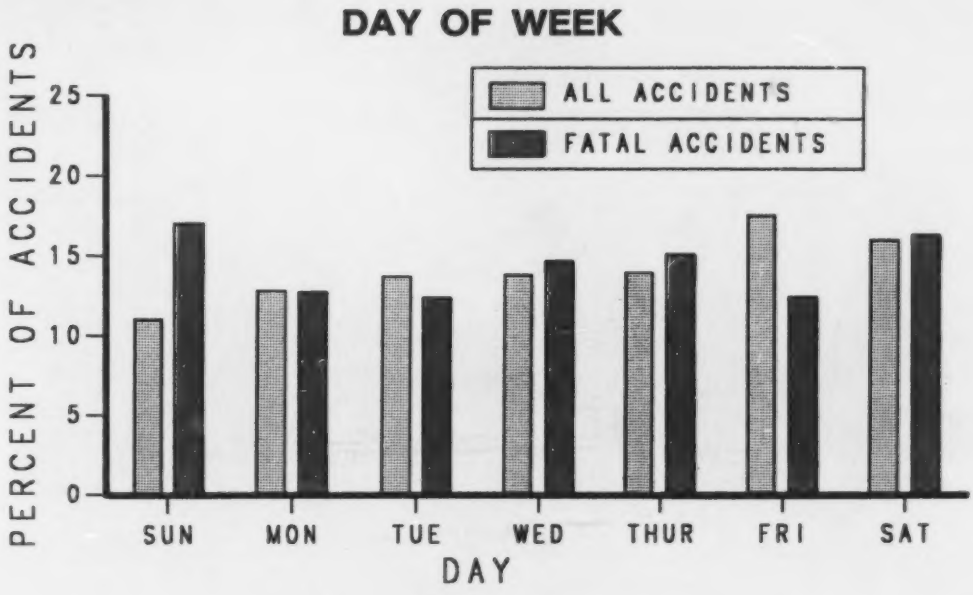
Rather than referring to numbers of accidents, the relative safety of different roadway classifications can be determined by accident rates. Table 5, below, provides accident rates for 1986. These rates are based on accidents per 100 million vehicle miles driven.

ACCIDENTS PER 100 MILLION VEHICLE MILES				
	ACCIDENT SEVERITY			
	FATAL	INJURY	PDO	TOTAL
Interstate	.9	30.3	49.4	80.6
State System Highways	1.9	83.7	132.7	218.3
Local Roads and Streets	2.4	177.9	284.4	464.8

(TABLE 5)

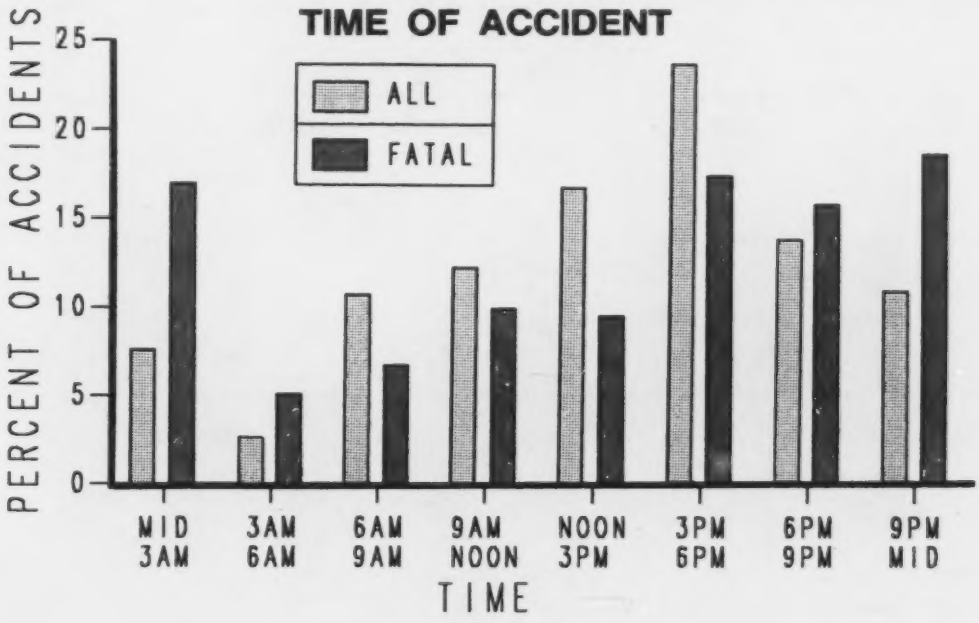
The interstate actually has the lowest accident rate for all accident categories, followed by the state highway system and then local roads.

DAY AND TIME



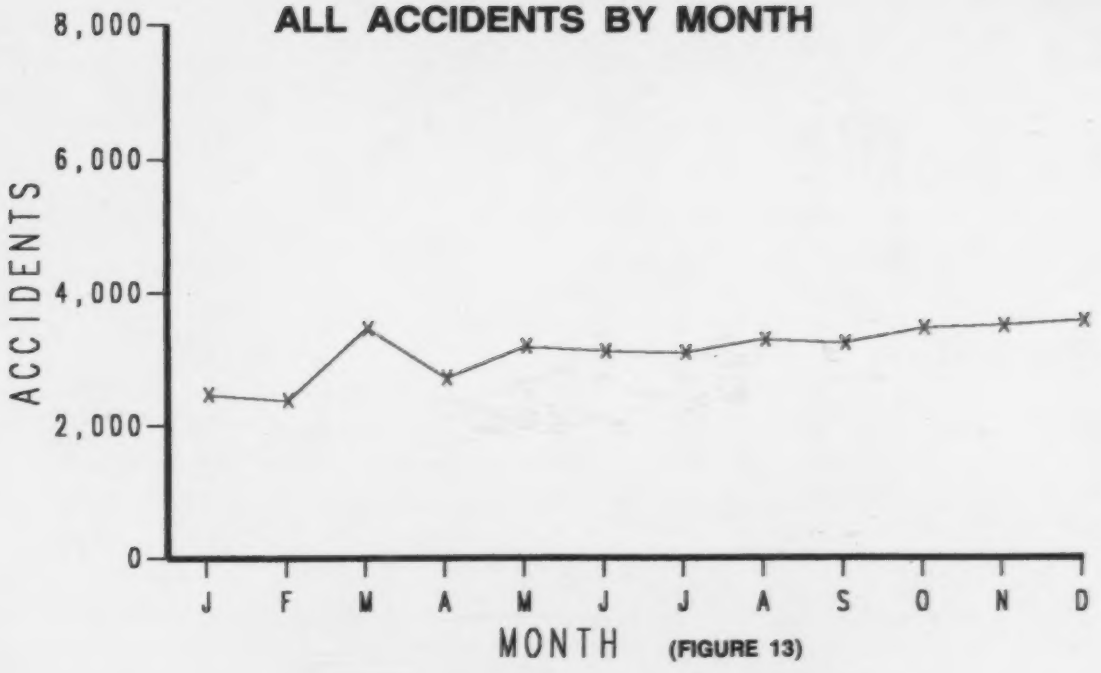
(FIGURE 11)

Accident rates are highest on weekends. In 1987, the highest percentage of all accidents, 17.7%, happened on Friday and the highest percentage of fatal accidents, 17%, happened on Sunday.

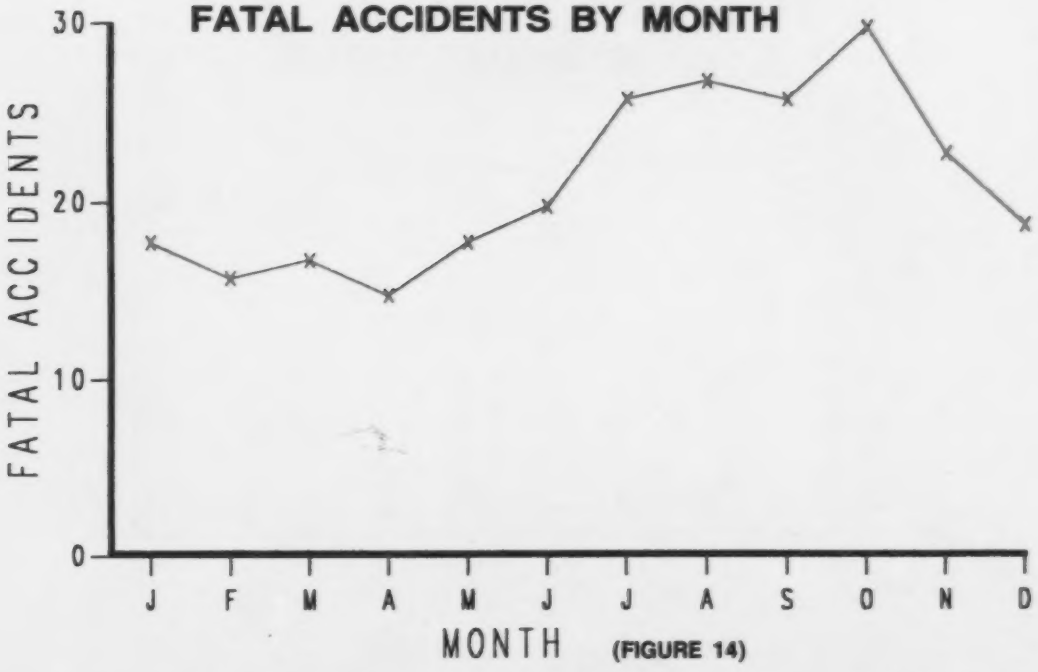


(FIGURE 12)

The number of accidents that occur during the day tend to follow people's daily activity cycle. Accident numbers increased from the early morning hours, until reaching a peak (23.9%) between 3:00 p.m. and 6:00 p.m. Fatal accidents, however, are highest in the late night to early morning hours. The highest percentage (18.6%) of fatal accidents occurred between 9:00 p.m. and 12:00 midnight.



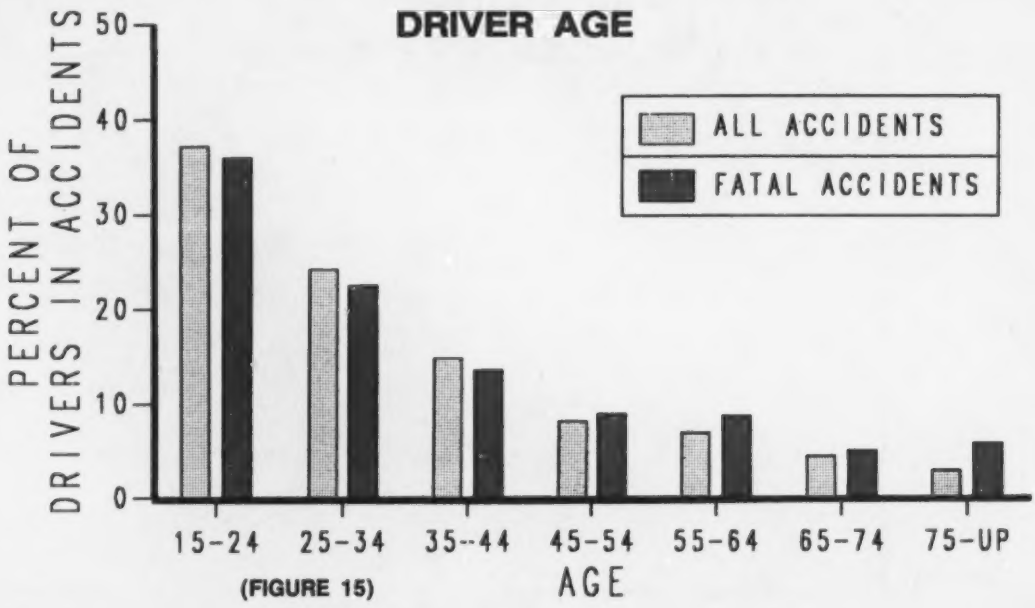
(FIGURE 13)



(FIGURE 14)

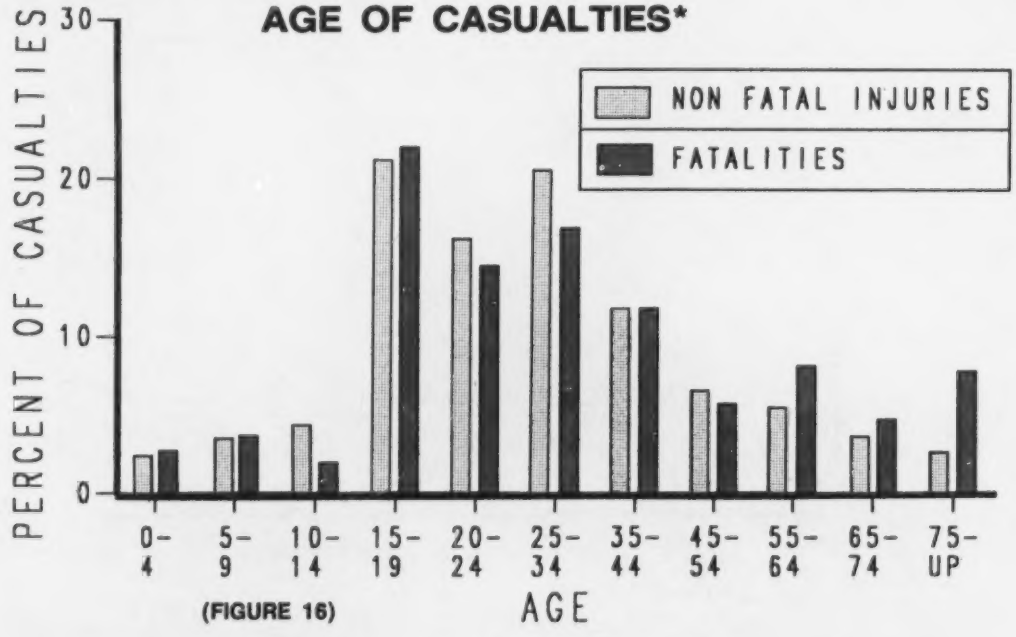
The seasonal cycles of all accidents and fatal accidents are illustrated in Figures 13 and 14. Accident numbers tend to increase during the late fall and winter as weather conditions worsen. Fatal accidents, however, tend to decrease during bad weather conditions because motorists tend to drive slower. Notice the jump in accident numbers in March. Nebraska experienced an unseasonably late blizzard at the end of March, in 1987.

AGE



(FIGURE 15)

Drivers aged 34 and younger were involved more often in all accidents (62%) and fatal accidents (58.5%) than all other age groups combined. In 1987, the age bracket with the highest percentage of drivers involved in accidents was the 15 to 24 year old age bracket. They were in 37.4% of all accidents and 36% of fatal accidents.



(FIGURE 16)

Figure 16 represents percentages of nonfatal and fatal injuries by age groups. The older age groups, those 55 and older, are overrepresented in fatal injuries as compared to nonfatal injuries. However, the highest percentages of both types of casualties occurred to those between the ages of 15 and 34. See Table 7 on Page 20 for number of casualties by age.

*Injured persons and fatalities.

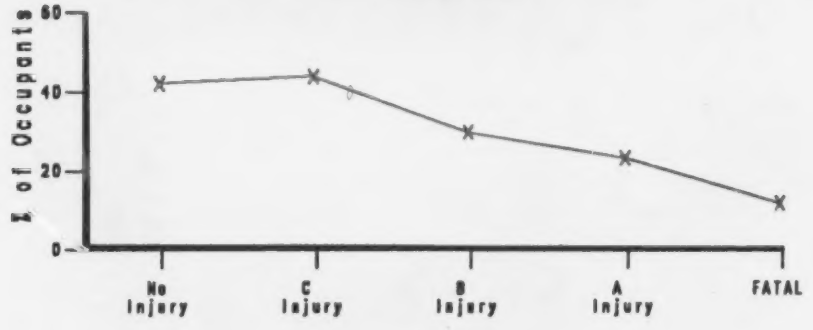
Injury severity and restraint usage for motor vehicle occupants is examined in Figures 17 and 18. Only those occupants with restraints available to them and whose restraint usage is known are included.

A fatal injury is an injury which results in death within 30 days of the traffic accident. An "A" injury is an incapacitating injury; one which prevents a person from performing normal activities. A visible injury that does not prevent the occupant from performing normal activities (e.g., cuts and bruises) is a "B" injury. A "C" injury is defined as a possible, nonvisible injury (e.g., a headache).

While restraints may not prevent injury in accidents, occupants who use restraints are less likely to receive a severe injury than those who do not. As the number of occupants who were not wearing seat belts increased, injury severity also increased. Approximately 89% of motor vehicle occupants that died in traffic accidents were not wearing restraints.

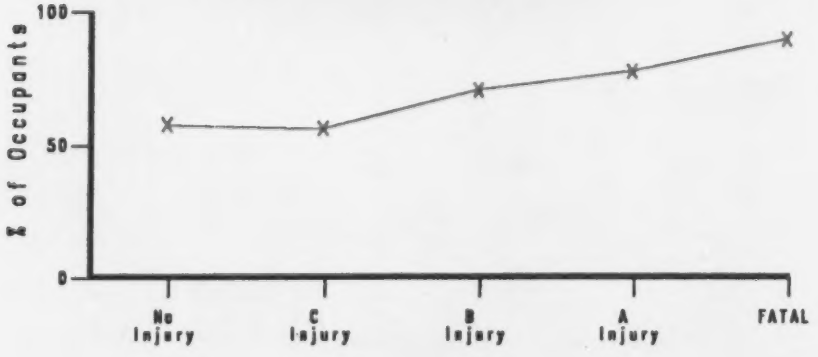
Research on restraint usage consistently shows the positive effect for all users, whether they are drivers or passengers. Restraints do not always prevent severe injuries or death in all crashes (e.g., train-motor vehicle accidents), but they are the best available preventive against death or severe injury to motor vehicle occupants.

INJURY SEVERITY FOR DRIVERS AND OCCUPANTS
INJURY AND FATAL ACCIDENTS ONLY
RESTRAINTS USED



(FIGURE 17)

INJURY SEVERITY FOR DRIVERS AND OCCUPANTS
INJURY AND FATAL ACCIDENTS ONLY
RESTRAINTS NOT USED



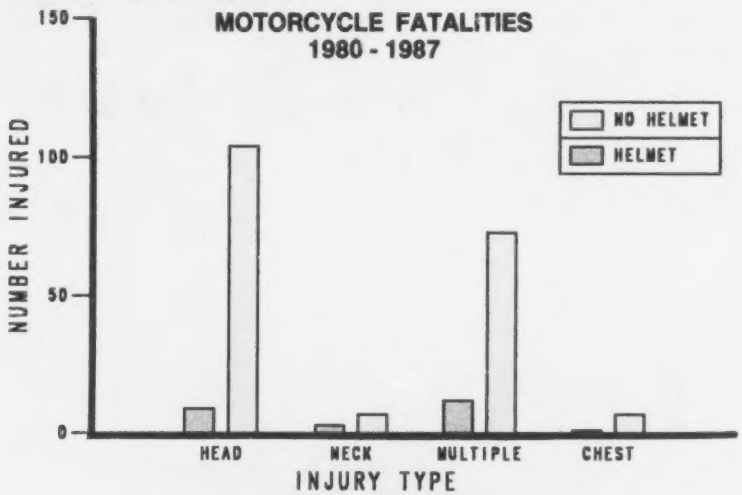
(FIGURE 18)

MOTORCYCLE FATALITIES

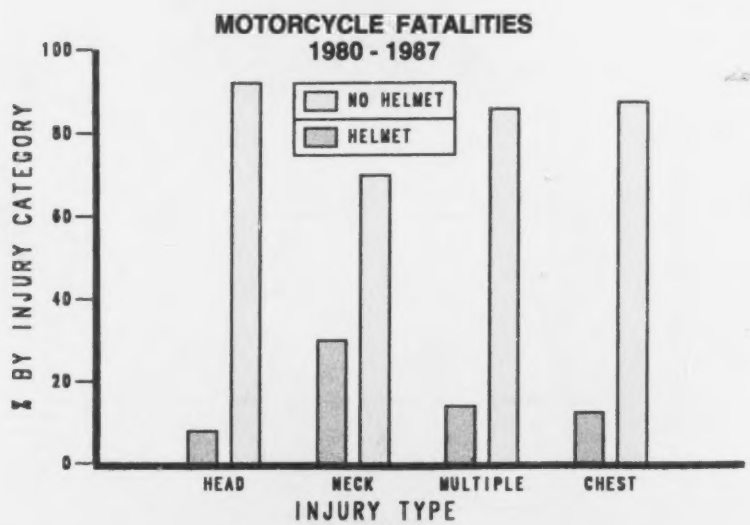
The most common type of injury received in motorcycle fatalities is an injury to the head. The likelihood of receiving a fatal head injury decreases greatly while wearing a helmet. Of the 113 people dying of head injuries received in motorcycle accidents since 1980, 104 (or 92%) were not wearing helmets. Figure 19 shows the number of motorcycle injuries by injury type and helmet usage. Figure 20 uses the same data but shows the percentages for each injury type. For each injury type helmet usage has been very low.

Two hundred twenty-seven motorcycle drivers and passenger have died in motor vehicle traffic accidents since 1980. Only twenty-six or 11.5% were wearing helmets. Neither Figure 19 nor 20 includes the 2 fatalities in which helmet usage is not known or the 9 fatalities where the injury type is listed as "other" or "unknown."

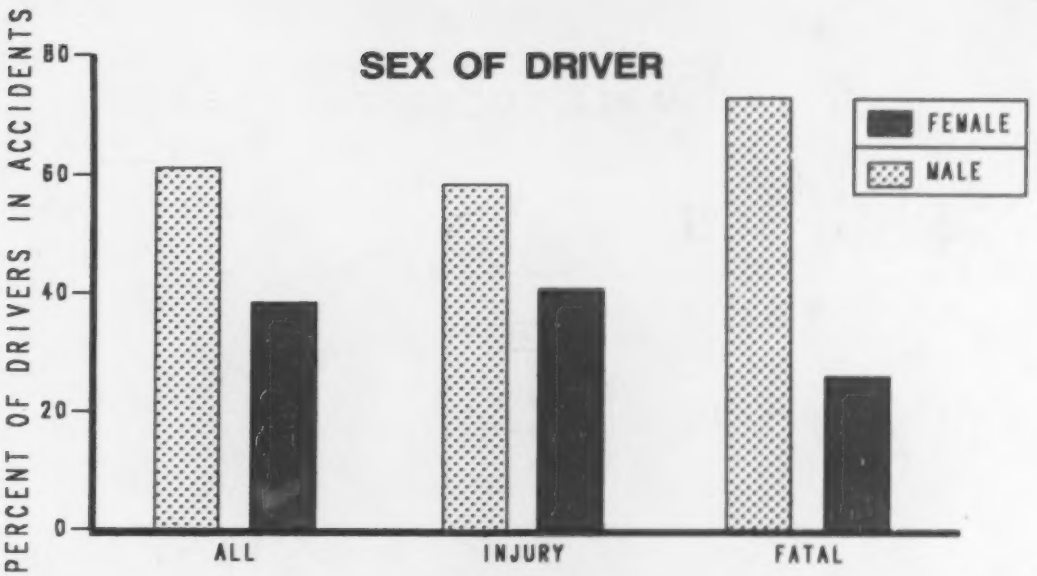
In 1987, there were twenty-six fatal accidents involving motorcycles; thirty-one drivers and their passengers died in those accidents.



(FIGURE 19)



(FIGURE 20)



(FIGURE 21)

Figure 21 shows the difference between male and female drivers' involvement in motor vehicle traffic accidents. Males represented 50.5% of licensed drivers in Nebraska in 1987, yet they were involved in 73.8% of all fatal accidents. However, these percentages do not take into account the vehicle miles driven by males versus females. Recent research indicates that males drive more miles than females.

SEX OF DRIVER	TOTAL	FATAL	INJURY	PDO
Male	38827	285	14868	23674
Female	24175	101	10269	13805

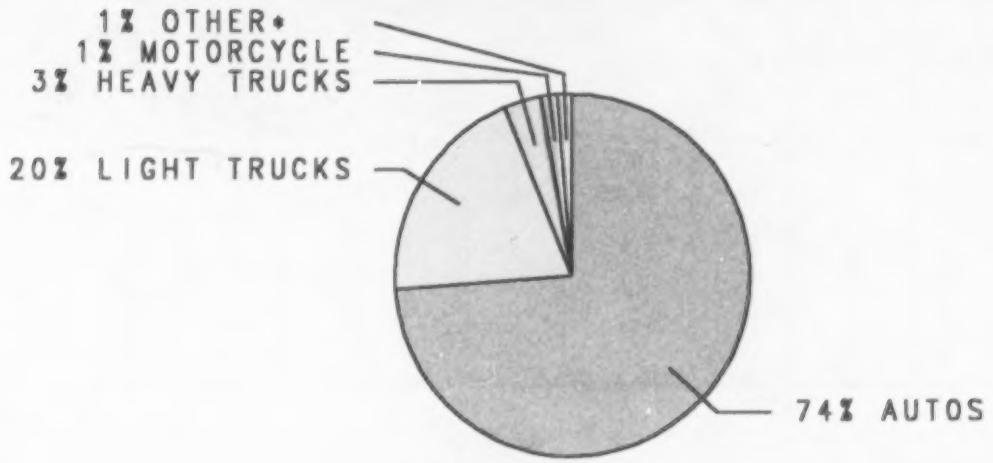
DOES NOT INCLUDE THOSE PERSONS WHOSE SEX WAS NOT STATED.

(TABLE 7)

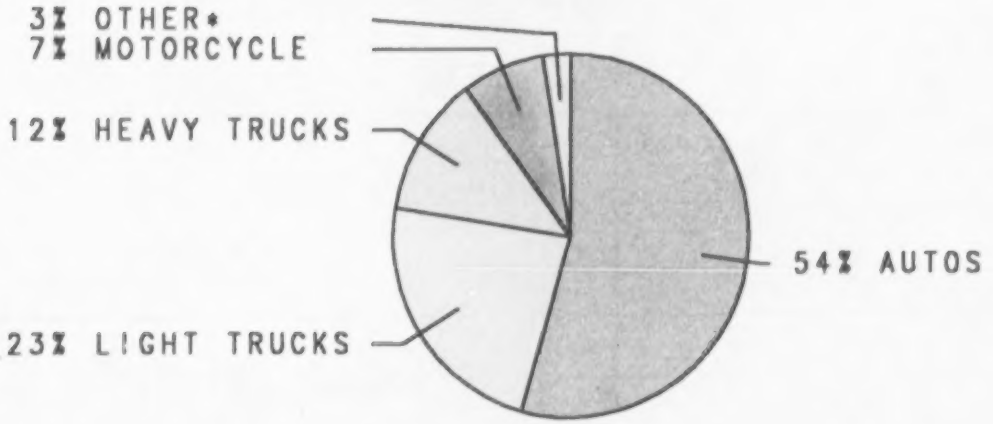
VEHICLE BODY STYLE IN ALL ACCIDENTS



(FIGURE 22)

** Other includes: commercial bus 0.1%, school bus 0.2%, motor home 0.1%, farm equipment 0.2%, and all others.*

VEHICLE BODY STYLE IN FATAL ACCIDENTS



(FIGURE 23)

** Other includes: one school bus, one motor home, five farm vehicles and three all other vehicle types.*

(Note: Due to rounding, the total percentages in Figures 23 and 24 do not equal 100%.

The major vehicle body styles involved in all accidents and fatal accidents are displayed in Figures 22 and 23. Compared to their involvement in all accidents, motorcycles and heavy trucks are overrepresented in fatal accidents. Motorcycles offer little protection to motorcycle riders involved in accidents, and heavy trucks tend to be involved in more severe accidents due to their large size. The number of accidents in each body style group is provided in the table below.

BODY STYLE OF VEHICLES IN ACCIDENTS		THIS YEAR			PERCENTAGE CHANGE OVER LAST YEAR		
		TOTAL	FATAL	INJURY	TOTAL	FATAL	INJURY
SINGLE UNIT	Passenger car or station wagon	48250	211	19043	+3%	-9%	+9%

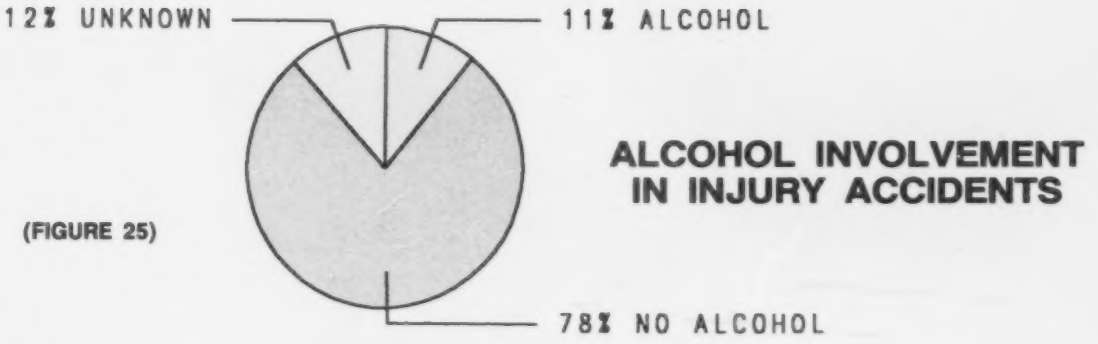
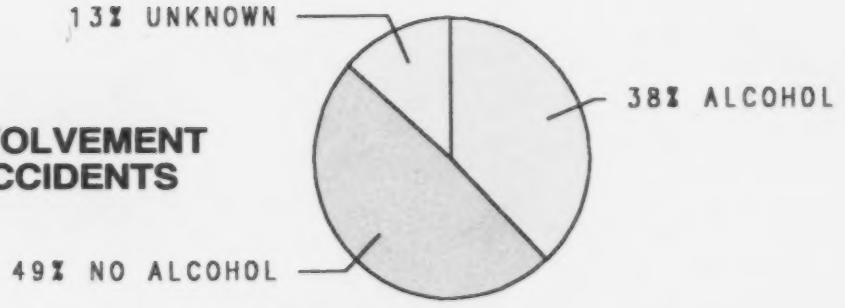
ALCOHOL INVOLVEMENT IN PDO ACCIDENTS

(FIGURE 24)



ALCOHOL INVOLVEMENT IN INJURY ACCIDENTS

(FIGURE 25)

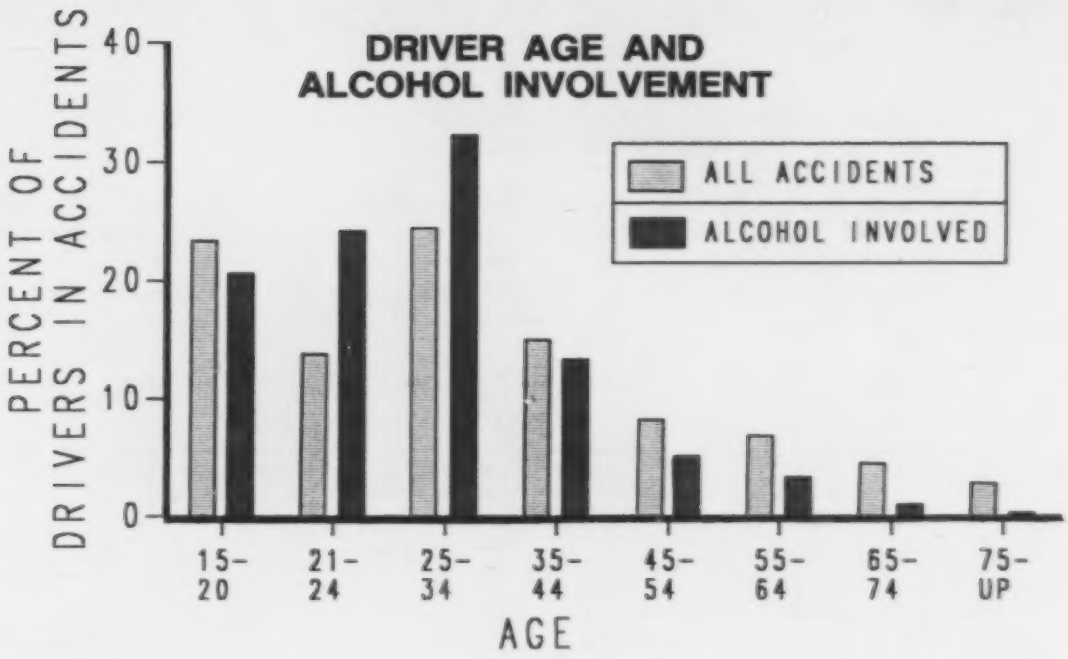


ALCOHOL INVOLVEMENT IN FATAL ACCIDENTS

(FIGURE 26)

Figures 24, 25, and 26 show the relationship between alcohol involvement and accident severity. As accident severity increased, so did alcohol involvement. In 1987, 38% of all fatal accidents in Nebraska involved alcohol. This figure is down from 45% in 1986. The National Traffic Safety Administration reports that 52.1% of fatal traffic accidents in the United States, in 1986, involved alcohol. If you consider that some of the 13% of fatal accidents with unknown alcohol involvement in Nebraska, in 1987, probably were alcohol related, then Nebraska's percentage gets closer to the national average. (Alcohol testing is only required for fatal accidents, thus, actual alcohol involvement in injury and PDO accidents may also be higher than is shown.)

(Note: Due to rounding, the total percentages do not equal 100% in Figures 24 and 25.)



(FIGURE 27)

The relationship between driver age and alcohol involvement in motor vehicle accidents is illustrated in Figure 27. Compared to their involvement in all accidents, drivers aged 21 to 34 are overrepresented in alcohol related accidents. In fact, these drivers are in 56.4% of alcohol involved accidents. Drivers aged 21-24 are most overrepresented, being involved in 24.2% of alcohol related accidents but only 13.9% of all accidents. Note that drivers between the ages of 15 and 20 are in 20.6% of alcohol related accidents, despite the fact that the legal drinking age in Nebraska is 21.

AGE OF DRIVER	TOTAL		FATAL		INJURY	
	ALL ACCIDENTS	ALCOHOL INVOLVED	ALL ACCIDENTS	ALCOHOL INVOLVED	ALL ACCIDENTS	ALCOHOL INVOLVED

(TABLE 9)

CONTRIBUTING CIRCUMSTANCES

CONTRIBUTING CIRCUMSTANCES IN ACCIDENTS

In 1987, there were 38,070 reportable motor vehicle traffic accidents in Nebraska with 63,541 drivers. In an effort to determine why an accident occurred, officers investigating an accident cite the "major contributing circumstance." Only one contributing circumstance is recorded for each accident. Most accidents are the result of improper driving. The table below lists some of the contributing circumstances reported and the number of accidents they were reported for in 1987.

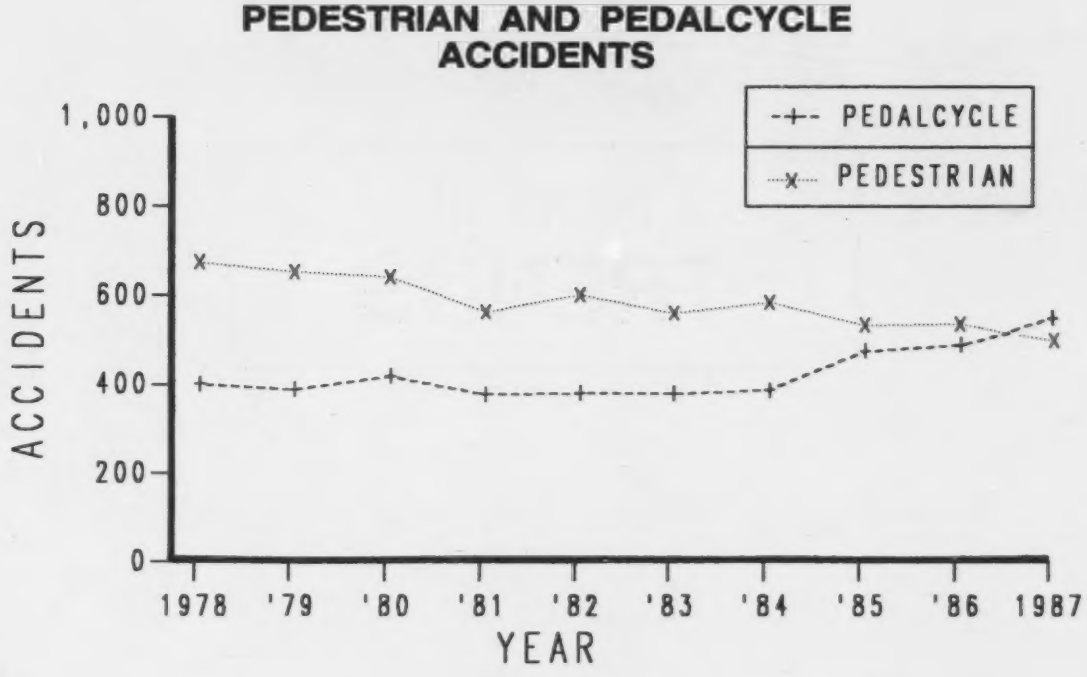
(Note: Due to rounding, the total percentages do not equal exactly 100%.)

CIRCUMSTANCE	NUMBER OF TIMES REPORTED	PERCENT (%) OF TOTAL
Failure to Yield	7,746	22.8
Speed too Fast for Conditions	2,985	8.8
Evasive Action	1,823	5.4
Following too Closely	3,948	11.6
Alcohol or Drugs	1,488	4.4
Backing Unsafely	1,276	3.8
Drove Left of Center	906	2.7
Made Improper Turn	1,115	3.3
Disregarded Traffic Signal	1,346	4.0
Other Improper Driving	6,591	19.4
Animal on Roadway	2,310	6.8
Other*	2,476	7.3
Total	**34,010**	**100%**

* *Includes: exceeding speed limit, improper overtaking, ran stop sign, improper or no turn signal, and improper lane change.*

PART III
TRENDS

PEDESTRIAN AND PEDALCYCLE

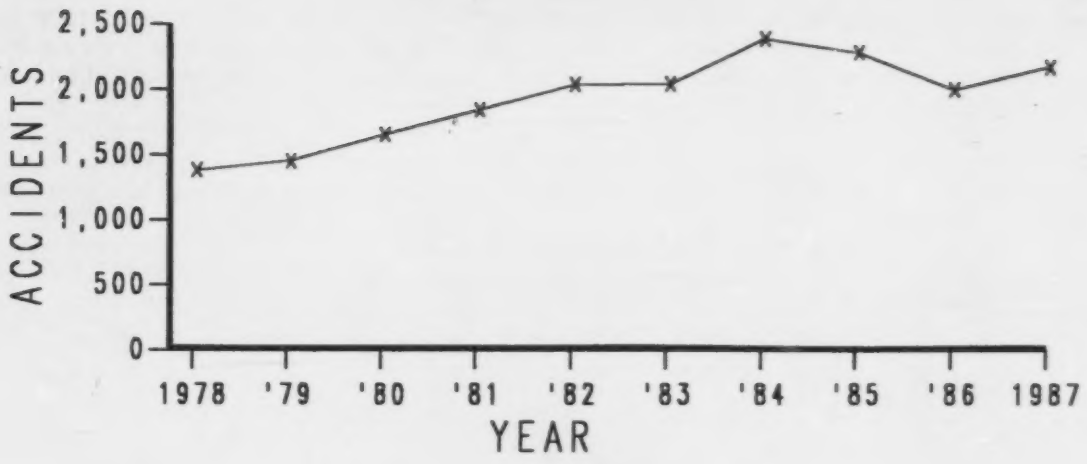


(FIGURE 28)

Figure 28 represents the number of pedestrian and pedalcycle accidents in Nebraska, over the past 10 years. Pedestrian accidents are down from 548 in 1986 to 510 in 1987. Pedestrian fatalities are also down, from 24 in 1986 to 14 in 1987. However, pedalcycle accidents are up. There were 547 in 1987, compared to 495 in 1986. Pedalcycle fatalities are up 1, from 3 in 1986, to 4 in 1987. Notice that there were actually more pedalcycle accidents than pedestrian accidents this year.

* *Pedalcycle - A vehicle operated solely by pedals, and propelled by human power. Includes bicycle, tricycle, and unicycle.*

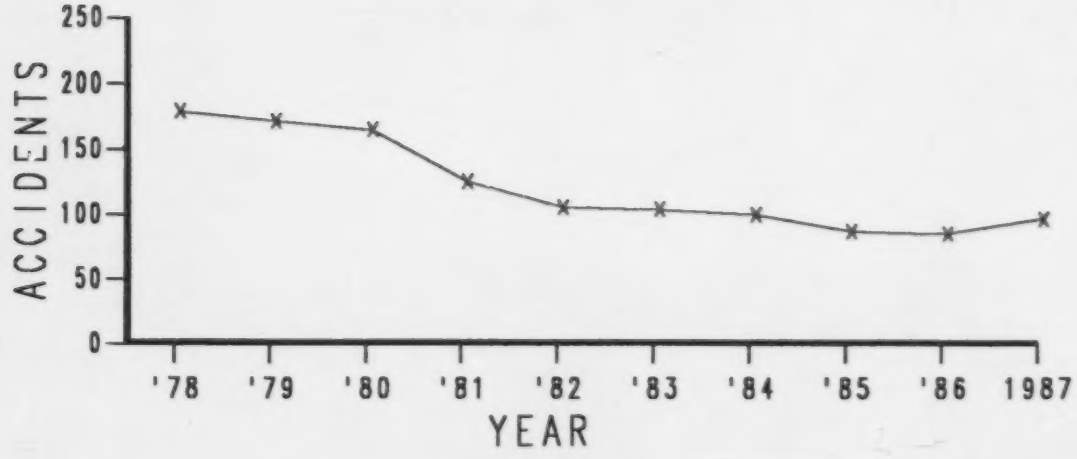
ANIMAL ACCIDENTS



(FIGURE 29)

The number of accidents involving animals, over the last 10 years, is depicted in Figure 29. Animal accidents have generally increased through the period, up 8.7% just this year. This rise may be partly in response to a growing deer population in Nebraska. Deer are the most frequently involved animals in motor vehicle-animal accidents.

RAILROAD ACCIDENTS



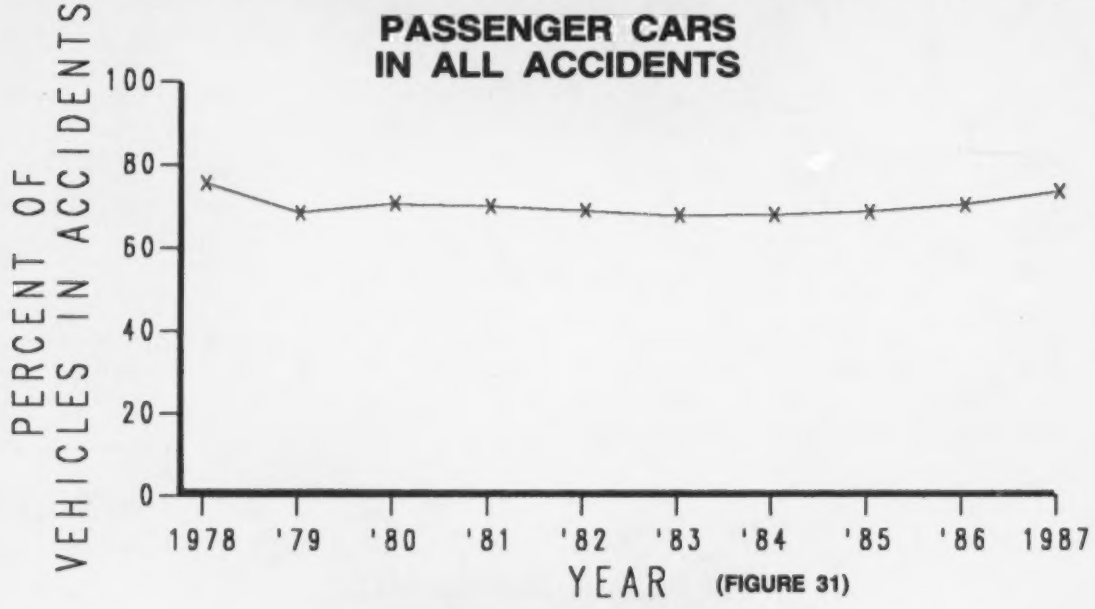
(FIGURE 30)

Even though this year's number of railroad accidents is up 11 accidents from 1986, there has been a general downward trend in railroad accidents since 1978. In 1987, 13 people died in 98 motor vehicle/train accidents in Nebraska.

BODY STYLE

The four most common body styles of vehicles involved in traffic accidents are passenger cars, light trucks or pickup trucks, heavy trucks and motorcycles. The percentage of accidents that each of the four body styles have been involved in, since 1978, is shown in the following two graphs. The percentage of traffic accidents involving light trucks has generally been increasing. The combined percentage of accidents involving passenger cars, heavy trucks and motorcycles has been decreasing slightly.

(Note: In any one year, the combined percentages of passenger cars, light trucks, heavy trucks and motorcycles will not total 100%. The percentage of "other" body styles, like buses, is not shown.)



(FIGURE 31)

STATE OF NEBRASKA

1988

ANNUAL REPORT

Prepared By
HIGHWAY SAFETY DIVISION
NEBRASKA DEPARTMENT OF ROADS

Nebraska
Department of Roads

KAY A. ORR
Governor

G. C. STROBEL
Director-State Engineer

Kay A. Orr

G. C. Strobel

Dear Reader,

The Highway Safety Division of the Nebraska Department of Roads is responsible for keeping records on all reportable motor vehicle accidents that occur within the State. They then analyze this data to determine accident trends and problems as they relate to motor vehicle safety. Annually, the Highway Safety Division publishes this report, *"Traffic Accident Facts,"* to provide an overview of the State's traffic accident data for the previous year.

The information needed for the accident records system is provided by law enforcement officers of local, county and state agencies. Their contributions are essential, and we thank them for their diligence and cooperation.

We hope that this booklet may provide some insight into traffic accident problems and the losses that occur as a result of motor vehicle accidents. Public awareness of these problems is a first step toward improving our driving experience.

Respectfully,

Kay A. Orr
Governor

G. C. Strobel
Director - State Engineer

Part III - Accident Trends	
Pedestrian and Pedalcycle	29
Animal	30
Railroad	30
Body Style: Passenger Cars in All Accidents, Vehicle Body Style in All Accidents	31

The data contained in this booklet is based on **REPORTABLE ACCIDENTS ONLY** as defined below. Definitions of various accident categories are also provided.

DEFINITIONS

Reportable Accident ..... An accident which involves death, injury, or property damage in excess of $500.00 to the property of any one person.

All Accidents ..... The total number of reportable motor vehicle accidents including fatal, injury or property damage.

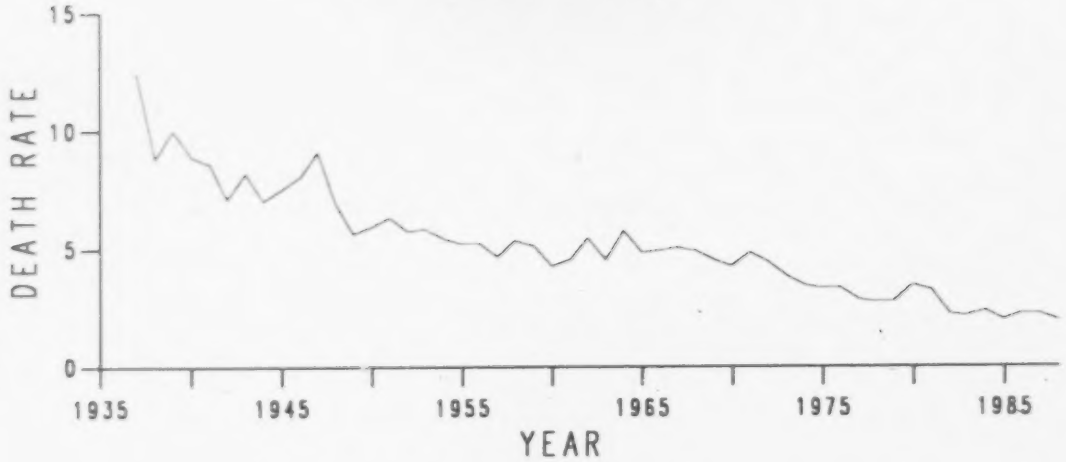
Fatal Accident ..... Motor vehicle accident that results in fatal injuries to one or more persons.

Injury Accident ..... Motor vehicle accident that results in injuries, other than fatal, to one or more persons.

Property Damage Only Accident (PDO) ..... Motor vehicle accident in which there is no injury to any person, but only damage to a motor vehicle, or to other property, including injury to domestic animals.

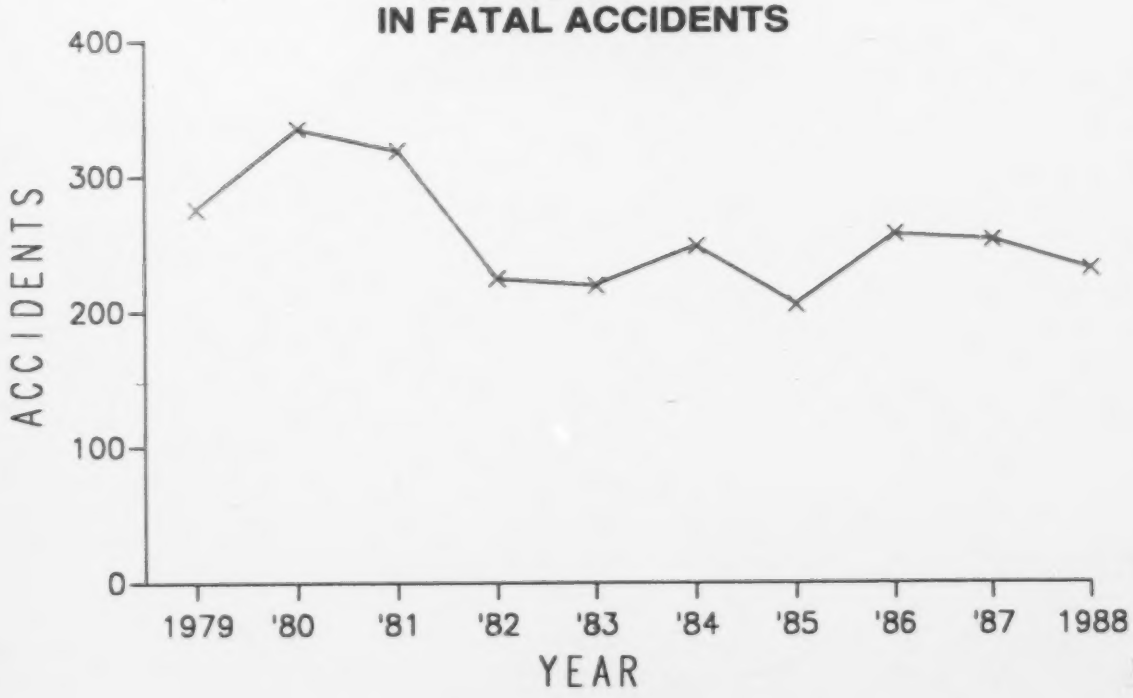
PART I
OVERVIEW

DEATH RATE PER 100 MILLION VEHICLE MILES (1937-1988)



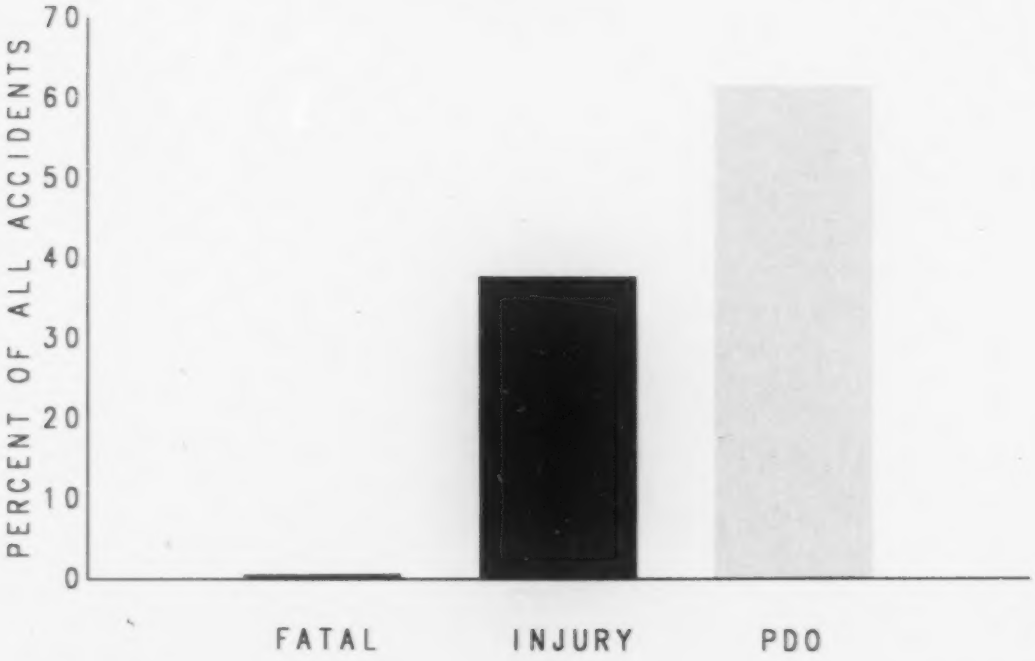
(FIGURE 1)

TEN YEAR TREND IN FATAL ACCIDENTS



(FIGURE 2)

ALL ACCIDENTS IN NEBRASKA
1988



(FIGURE 3)

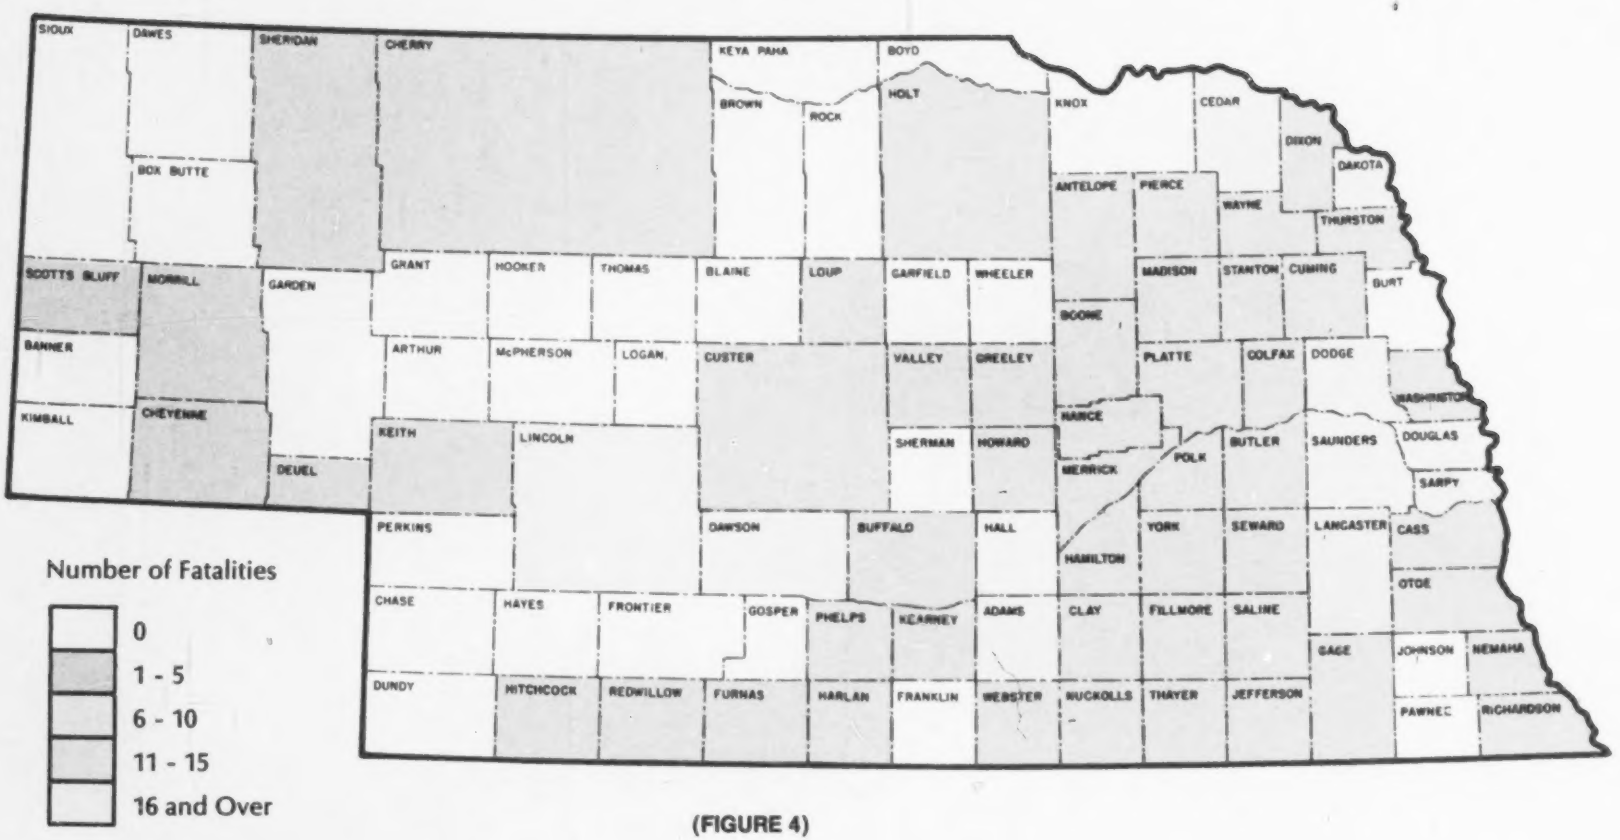
The number of persons killed per 100 million vehicle miles traveled in Nebraska, from 1937 to 1988, is represented in Figure 1 (Page 3). Even though the death rate fluctuates from year to year, there has been a general downward trend. Much of this reduction can be attributed to improvements in vehicle design, roadway engineering, specific safety programs, enforcement and improved driver awareness.

Figure 2 (Page 3) depicts the number of fatal accidents per year for the last ten years. In 1988, there were 234 fatal accidents, compared to 255 in 1987. This represents a slight decrease (-8.2%) from the previous year.

Fatal accidents make up only a small portion of the total accidents in Nebraska. Property damage only (PDO) accidents make up the majority. Figure 3, above, shows the percentage distribution of all accident types. In 1988, there were 234 fatal accidents, 14,892 injury accidents and 24,272 property damage only (PDO) accidents. Fatal accidents made up .6% of all accidents, and injury and PDO accidents made up 37.8% and 61.6%, respectively.

1988
GEOGRAPHIC SUMMARY
OF TRAFFIC FATALITIES BY COUNTY

TOTAL TRAFFIC FATALITIES - 261



(FIGURE 4)

Douglas County, which contains Omaha, the state's largest city, had the highest number of traffic fatalities with **39**, followed by Hall County with **16**, and Lancaster County with **15**. Thirty-two counties experienced no fatalities in 1988.

PART II
1988 DATA

NUMBER OF TRAFFIC ACCIDENTS

ALL ACCIDENTS	39,398
PROPERTY DAMAGE ONLY (PDO)	24,272
INJURY ACCIDENTS	14,892
PERSONS INJURED	*22,214*
FATAL ACCIDENTS	234
FATALITIES	*261*
NUMBER OF REGISTERED VEHICLES IN NEBRASKA	1,522,285
NUMBER OF REGISTERED DRIVERS IN NEBRASKA	1,107,368
*NUMBER OF VEHICLES IN ACCIDENTS	71,081
*NUMBER OF DRIVERS IN ACCIDENTS	66,112

**THERE MAY BE MORE THAN ONE VEHICLE OR DRIVER INVOLVED IN A SINGLE ACCIDENT. PARKED, AND DRIVERLESS VEHICLES ARE INCLUDED.*

DURING 1988:

ONE ACCIDENT OCCURRED EVERY 13 MINUTES

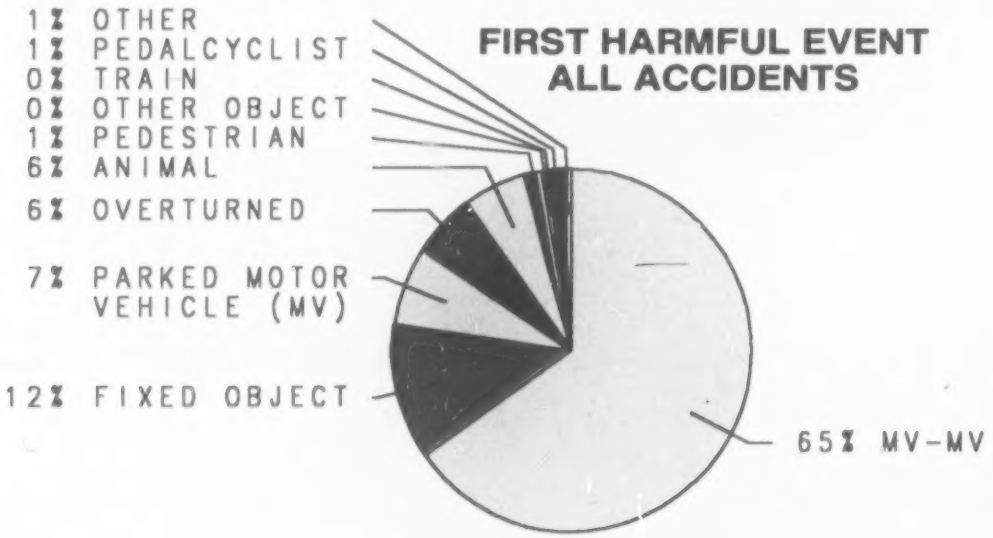
63 PERSONS WERE INJURED EACH DAY

ONE PERSON WAS KILLED EVERY 33 HOURS

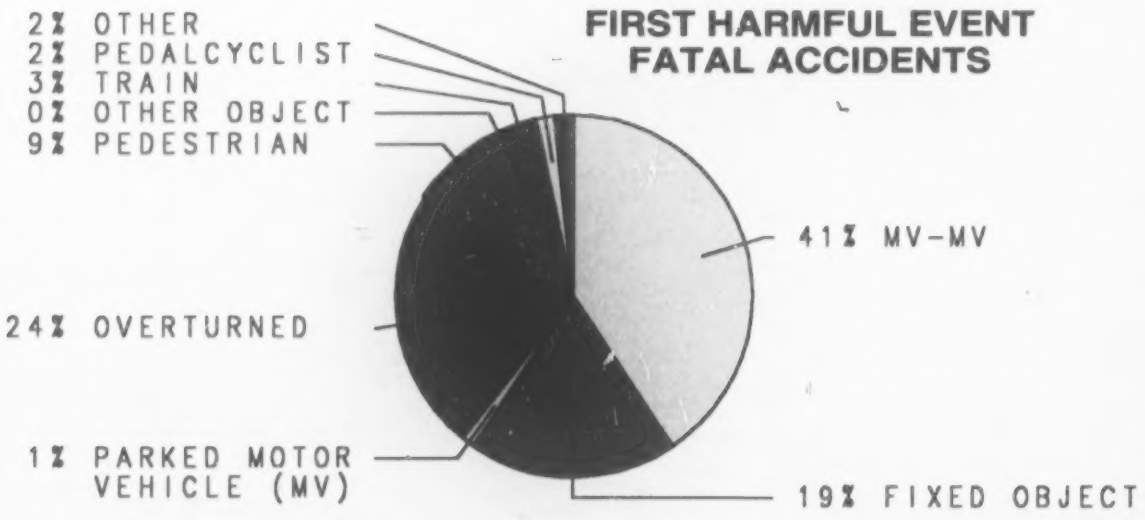
*THE ECONOMIC LOSS IN TERMS OF DOLLARS WAS $679,104,000.00

**ECONOMIC LOSS FIGURES ARE DERIVED FROM THE NATIONAL SAFETY COUNCIL BULLETIN, ESTIMATING THE COST OF ACCIDENTS, 1986. COST COMPONENTS MEASURED ARE: REPAIR COSTS TO VEHICLES AND PEOPLE, AND LOSSES IN PRODUCTION AND ABILITY TO PRODUCE. THESE FIGURES WERE ADJUSTED UPWARD IN 1988 WITH A DRAMATIC IMPACT ON ECONOMIC LOSS.*

First harmful event (FHE) is the initial incident that causes injury or damage. It is sometimes referred to as "type of accident" and implies a collision with each of the objects listed in the following charts. "Overturned" and "other" accidents refer to accidents where no collision is involved (e.g., a car loses control and overturns, a car catches on fire).



(FIGURE 5)



(FIGURE 6)

First harmful events for all accidents and for fatal accidents are shown in Figures 5 and 6. In both types of accidents, collisions between two or more moving vehicles (MV-MV) make up the majority of accidents. Accidents involving fixed objects, vehicles overturning, pedestrians and trains tend to be more severe, as indicated by their overrepresentation in fatal accidents as compared to all accidents. *(Note: Due to rounding, the total percentages do not equal 100% in Figure 6. There were no fatal traffic accidents involving animals in 1988.)*

The following table provides the numbers of accidents in each category listed in Figures 5 and 6 on the previous page.

1988

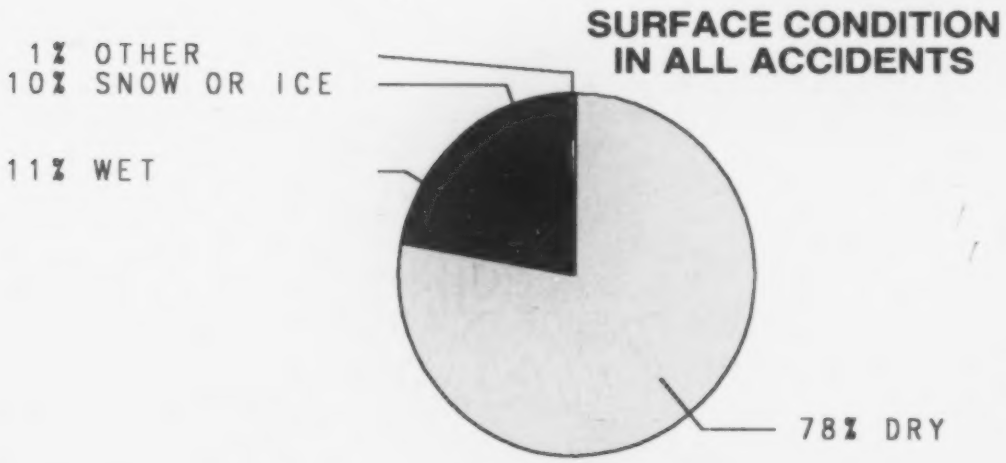
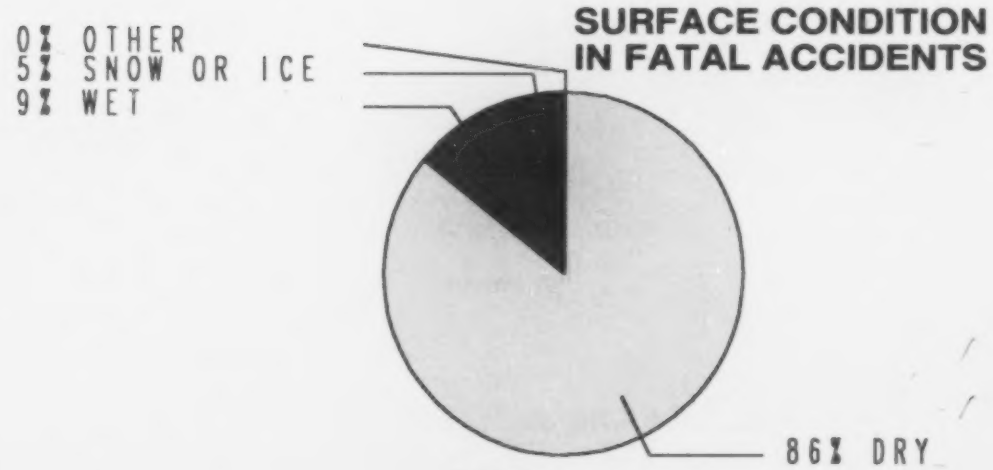
(TABLE 2)

Table 2 provides 1987 data for comparison to 1988.

In 1988, there was a 8.2% decrease in fatal accidents as compared to 1987, and a 12.2% decrease in deaths resulting from these accidents. Both injury accidents and injuries increased, up 2.2% and 4.4%, respectively. The number of PDO accidents increased slightly from 23,248 in 1987 to 24,272 in 1988.



(FIGURE 7)



(FIGURE 8)

The condition of the road surface plays an important role in motor vehicle accidents. Slick road conditions are generally more hazardous than dry conditions, but drivers tend to compensate for this by being more cautious. Fewer fatal accidents actually occur under slick road surface conditions than under dry road conditions. The percentage of all accidents which occurred on slick roads decreased from 1987. This is primarily due to drought conditions in Nebraska.

The following table provides the number of accidents in each category.

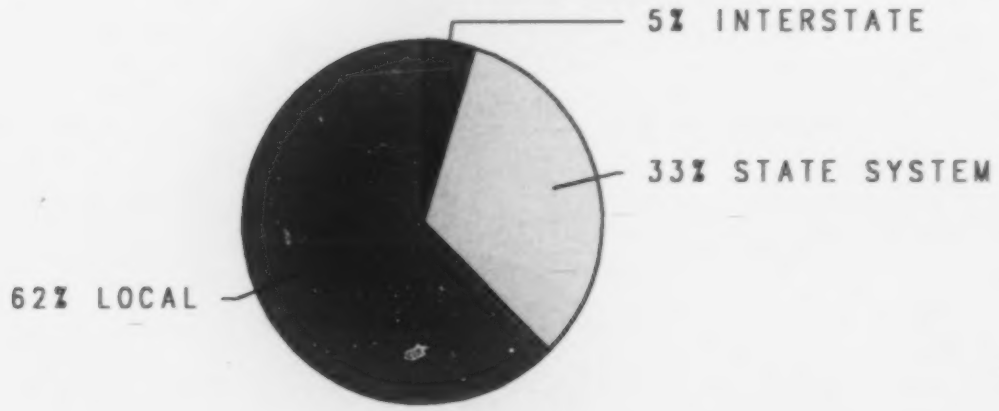
ROAD SURFACE CONDITION	TOTAL	FATAL	INJURY	PDO
Dry	30395	199	11919	18277
Wet	4417	21	1765	2631
Snowy or icy	4034	12	1048	2974
Other	245		92	153
Not stated	307	2	68	237
– TOTALS –	39398	234	14892	24272

(TABLE 3)

TYPE OF ROADWAY

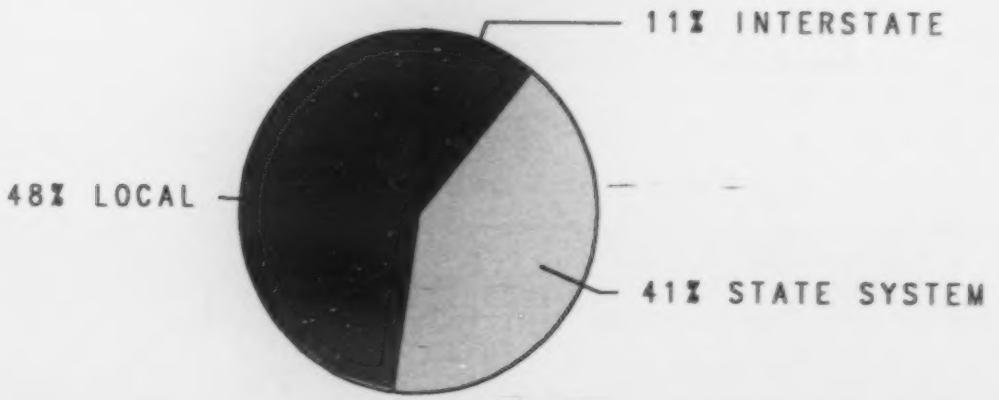
The distributions of all accidents and fatal accidents, by roadway type, are shown in Figures 9 and 10. Table 4 shows the actual number of accidents and casualties by roadway type. The percent of fatal accidents that occur on the interstate and on state highways is larger than the percent of all accidents that occur on the interstate and on state highways. Accidents on interstate and state highways tend to occur at higher speeds; this accounts somewhat for the increased severity of these accidents.

ALL ACCIDENTS BY TYPE OF ROADWAY



(FIGURE 9)

FATAL ACCIDENTS BY TYPE OF ROADWAY



(FIGURE 10)

– TOTALS –		39398	234	14892	24272	261	22214

(TABLE 4)

Rather than referring to numbers of accidents, the relative safety of different roadway classifications can be determined by accident rates. Table 5, below, provides accident rates for 1988. These rates are based on accidents per 100 million vehicle miles driven.

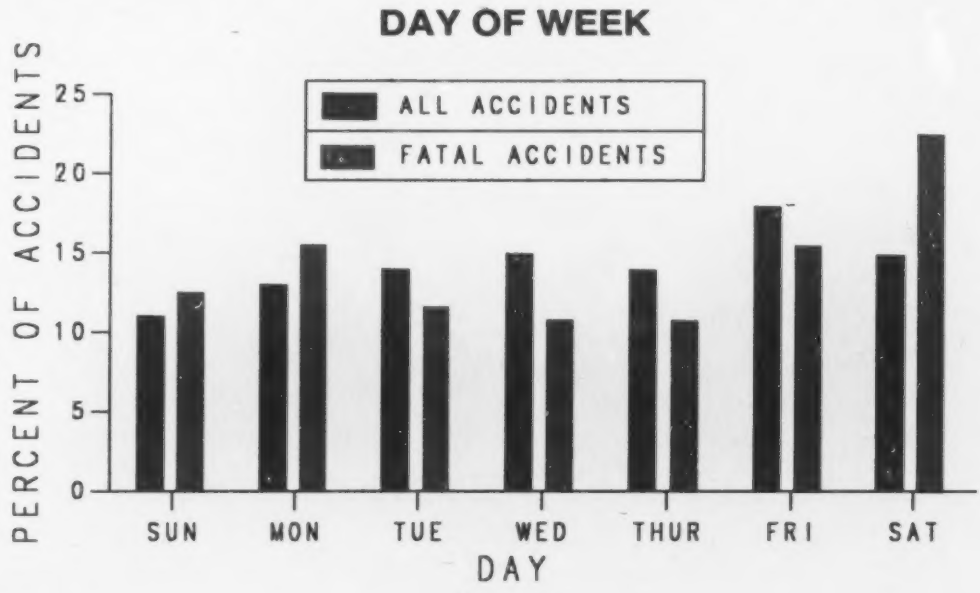
ACCIDENTS PER 100 MILLION VEHICLE MILES*				
	ACCIDENT SEVERITY			
	FATAL	INJURY	PDO	TOTAL
Interstate	1.1	27.9	49.1	78.0
State System Highways	1.6	84.8	131.8	218.2
Local Roads and Streets	2.2	179.5	298.3	479.9

(TABLE 5)

The interstate actually has the lowest accident rate for all accident categories, followed by the state highway system and then local roads.

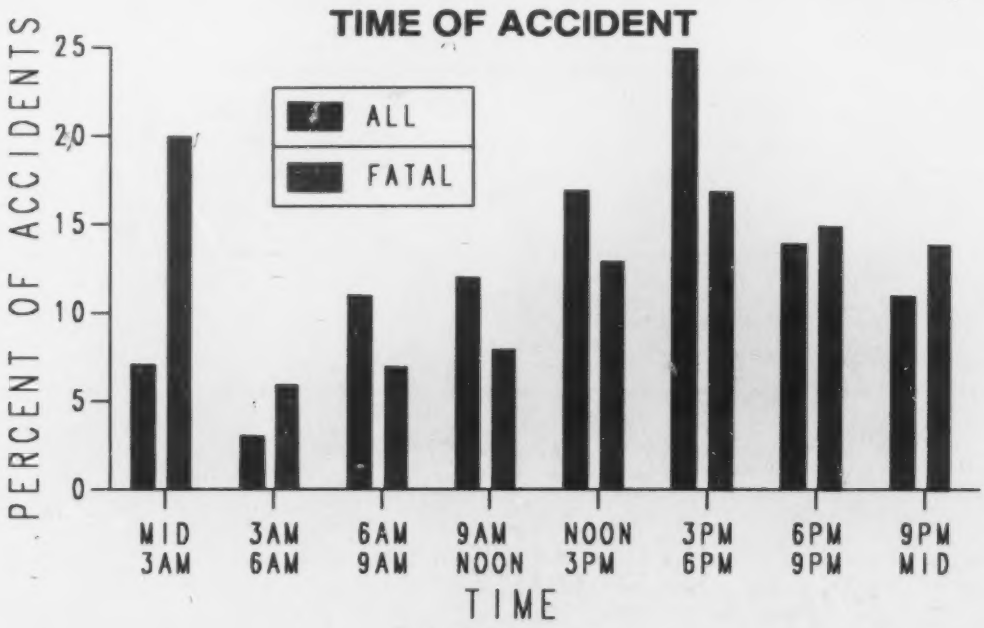
*Vehicle miles traveled used in this table are preliminary.

DAY AND TIME



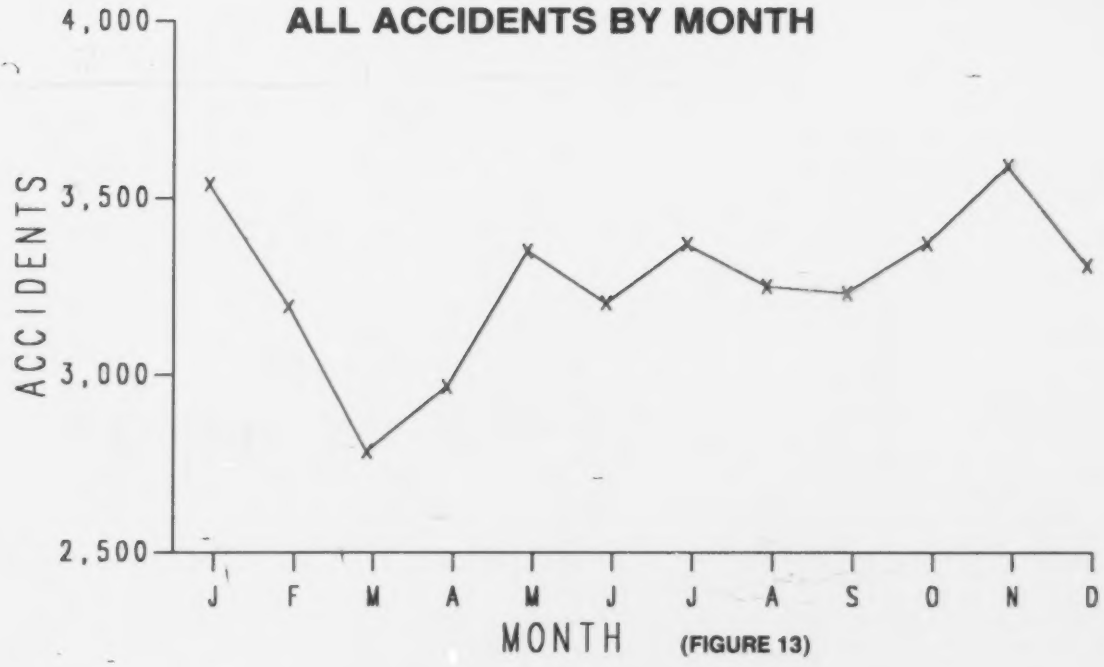
(FIGURE 11)

Accident rates are highest on weekends. In 1988, the highest percentage of all accidents, 17.7%, happened on Friday and the highest percentage of fatal accidents, 22.6%, happened on Sunday.

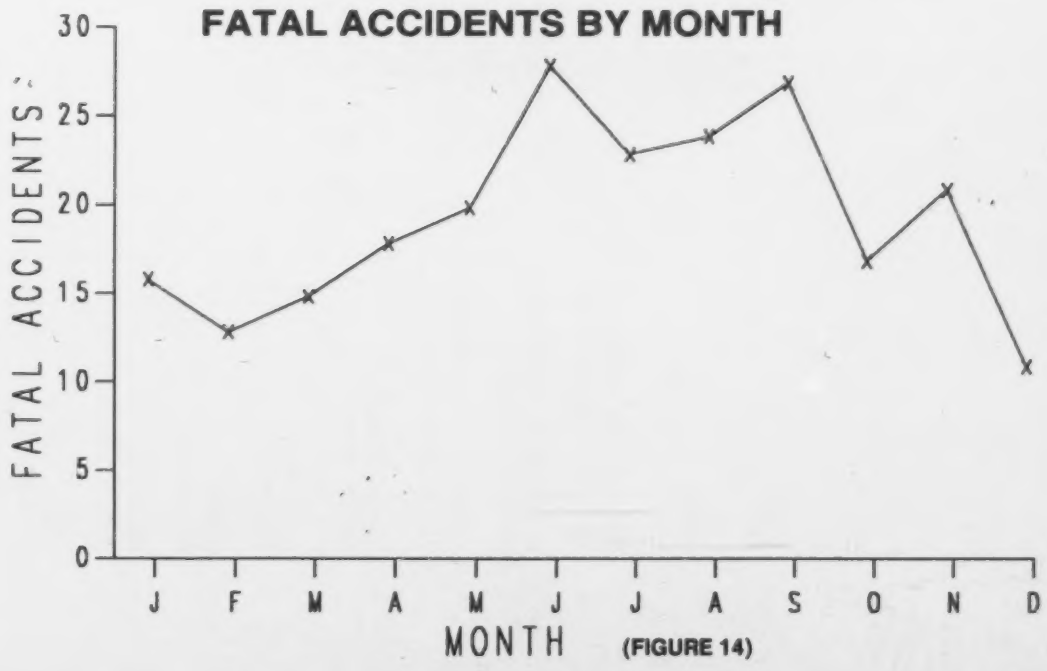


(FIGURE 12)

The number of accidents that occur during the day tend to follow people's daily activity cycle. Accident numbers increased from the early morning hours, until reaching a peak (25.0%) between 3:00 p.m. and 6:00 p.m. Fatal accidents, however, are highest in the late night to early morning hours. The highest percentage (19.6%) of fatal accidents occurred between 12:00 midnight and 3:00 a.m.

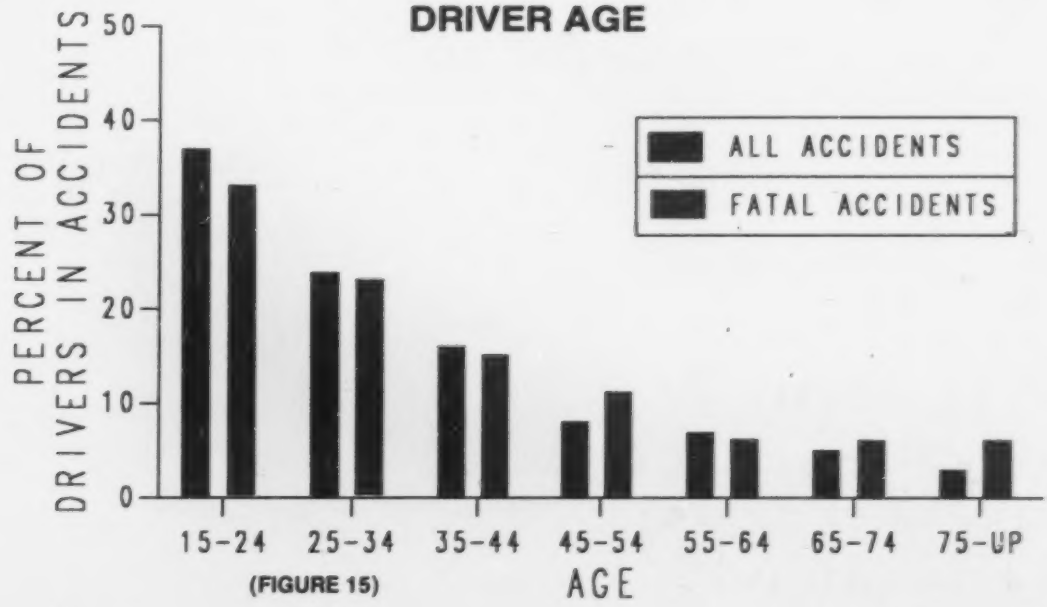


(FIGURE 13)



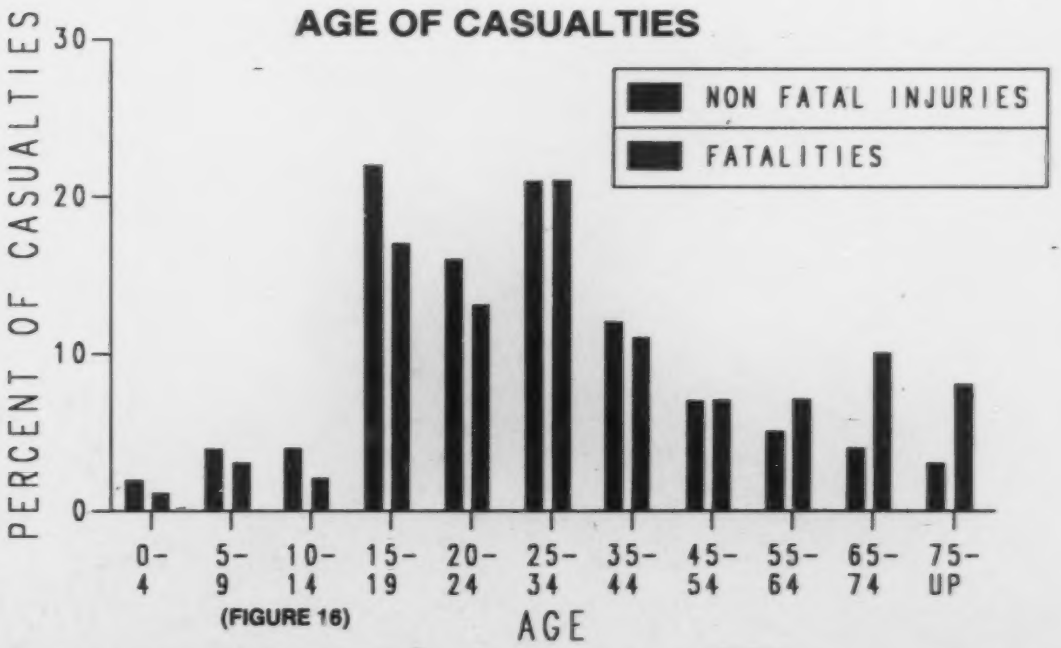
(FIGURE 14)

The seasonal cycles of all accidents and fatal accidents are illustrated in Figures 13 and 14. Accident numbers usually tend to increase during the late fall and winter as weather conditions worsen. Fatal accidents, however, tend to decrease during bad weather conditions once motorists adjust to less than perfect driving conditions.



(FIGURE 15)

Drivers aged 34 and younger were involved more often in all accidents (61.1%) and fatal accidents (55.7%) than all other age groups combined. In 1988, the age bracket with the highest percentage of drivers involved in accidents was the 15 to 24 year old age bracket. They were in 36.7% of all accidents and 33% of fatal accidents.



(FIGURE 16)

Figure 16 represents percentages of nonfatal and fatal injuries by age groups. The older age groups, those 55 and older, are overrepresented in fatal injuries as compared to nonfatal injuries. However, the highest percentages of both types of casualties occurred to those between the ages of 15 and 34. See Table 7 on Page 20 for number of casualties by age.

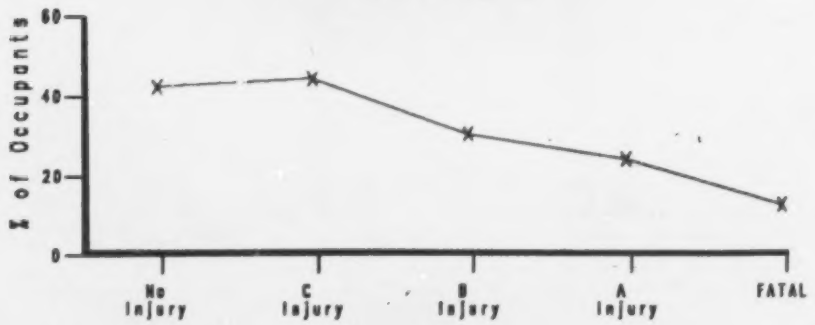
Injury severity and restraint usage for motor vehicle occupants is examined in Figures 17 and 18. Only those occupants with restraints available to them and whose restraint usage is known are included.

A fatal injury is an injury which results in death within 30 days of the traffic accident. An "A" injury is an incapacitating injury; one which prevents a person from performing normal activities. A visible injury that does not prevent the occupant from performing normal activities (e.g., cuts and bruises) is a "B" injury. A "C" injury is defined as a possible, nonvisible injury (e.g., a headache).

While restraints may not prevent injury in accidents, occupants who use restraints are less likely to receive a severe injury than those who do not. As the number of occupants who were not wearing seat belts increased, injury severity also increased. Approximately 87% of motor vehicle occupants that died in traffic accidents were not wearing restraints.

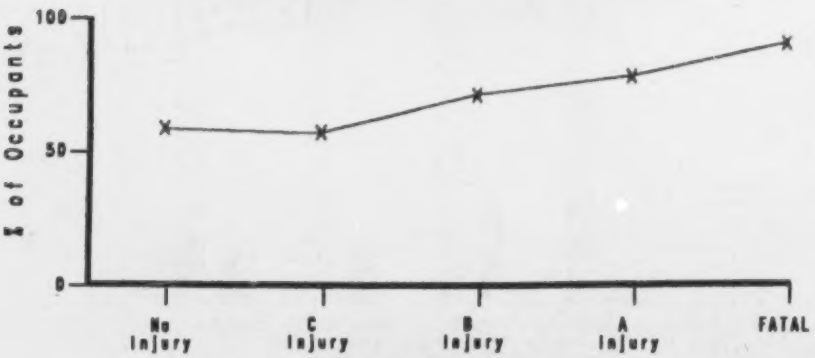
Research on restraint usage consistently shows the positive effect for all users, whether they are drivers or passengers. Restraints do not always prevent severe injuries or death in all crashes (e.g., train-motor vehicle accidents), but they are the best available preventative against death or severe injury to motor vehicle occupants.

INJURY SEVERITY FOR DRIVERS AND OCCUPANTS
INJURY AND FATAL ACCIDENTS ONLY
RESTRAINTS USED



(FIGURE 17)

INJURY SEVERITY FOR DRIVERS AND OCCUPANTS
INJURY AND FATAL ACCIDENTS ONLY
RESTRAINTS NOT USED



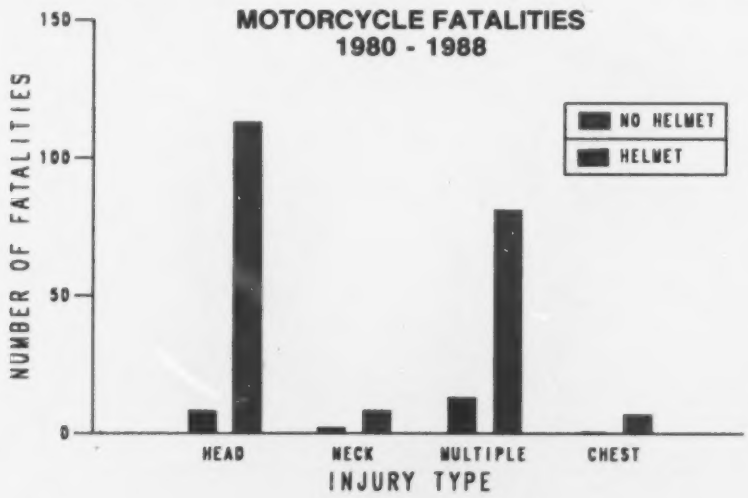
(FIGURE 18)

MOTORCYCLE FATALITIES

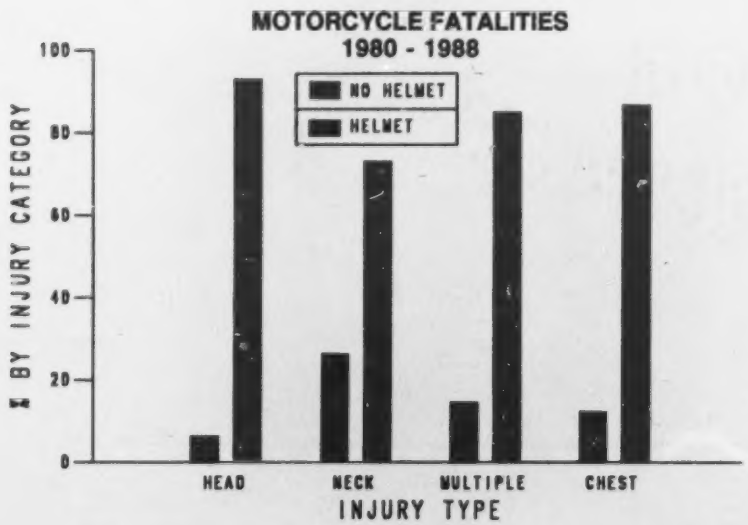
The most common type of injury received in motorcycle fatalities is an injury to the head. The likelihood of receiving a fatal head injury decreases greatly while wearing a helmet. Of the 122 people dying of head injuries received in motorcycle accidents since 1980, 113 (or 93%) were not wearing helmets. Figure 19 shows the number of motorcycle injuries by injury type and helmet usage. Figure 20 uses the same data but shows the percentages for each injury type. For each injury type helmet usage has been very low.

Two hundred forty-seven motorcycle drivers and passengers have died in motor vehicle traffic accidents since 1980. Only twenty-eight or 11.3% were wearing helmets. Neither Figure 19 nor 20 includes the 2 fatalities in which helmet usage is not known or the 9 fatalities where the injury type is listed as "other" or "unknown."

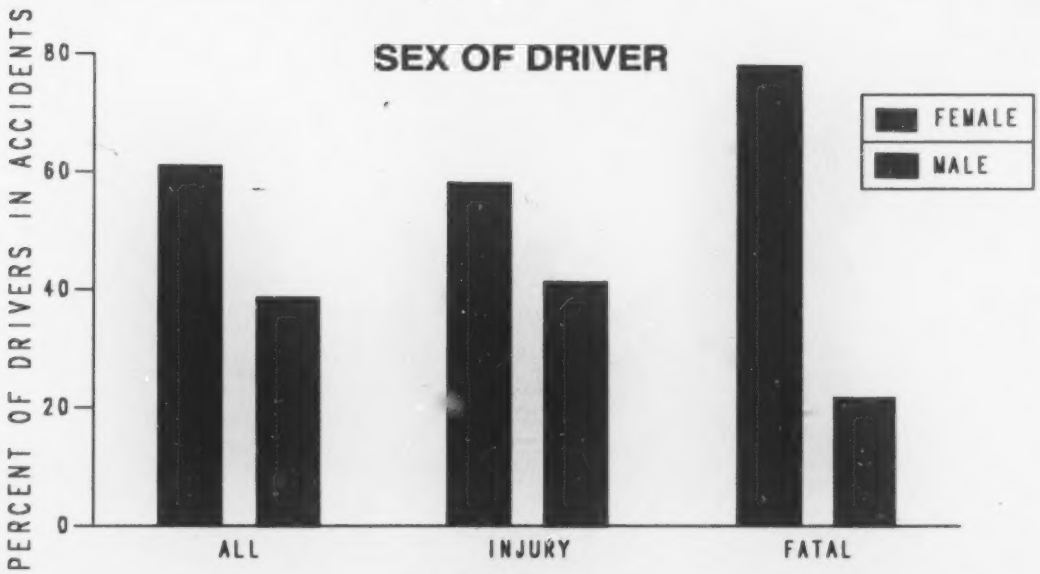
In 1988, there were nineteen fatal accidents involving motorcycles; nineteen drivers and their passengers died in those accidents.



(FIGURE 19)



(FIGURE 20)



(FIGURE 21)

Figure 21 shows the difference between male and female drivers' involvement in motor vehicle traffic accidents. Males represented 50.6% of licensed drivers in Nebraska in 1988, yet they were involved in 77.9% of all fatal accidents. However, these percentages do not take into account the vehicle miles driven by males versus females. Recent research indicates that males drive more miles than females.

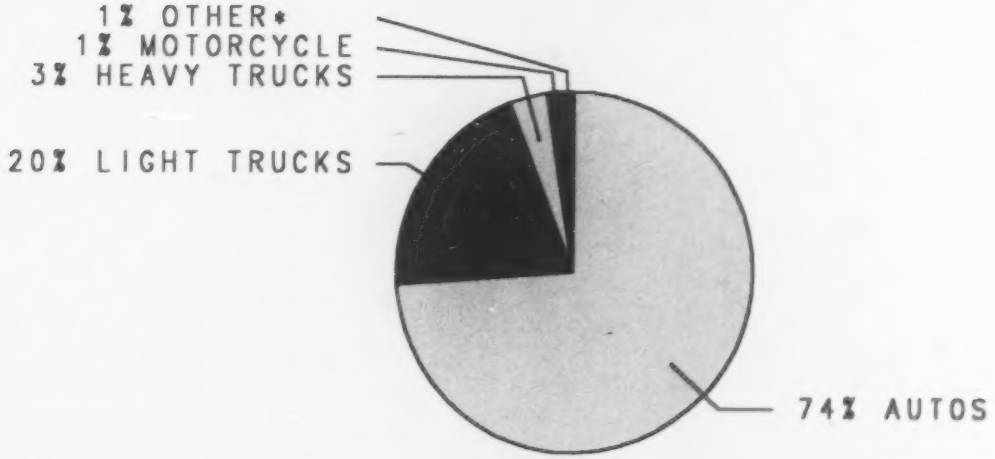
(TABLE 7)

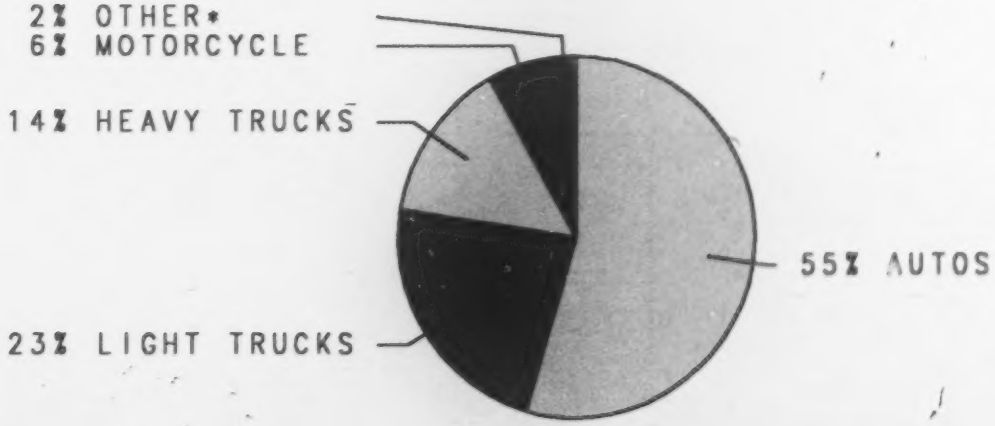
VEHICLE BODY STYLE IN ALL ACCIDENTS



(FIGURE 22)

* *Other includes: commercial bus 0.1%, school bus 0.1%, motor home 0.1%, farm equipment 0.2%, and all others.*

VEHICLE BODY STYLE IN FATAL ACCIDENTS



(FIGURE 23)

* *Other includes: one school bus, four farm vehicles and four all other vehicle types.*

(Note: Due to rounding, the total percentages in Figure 22 do not equal 100%.)

The major vehicle body styles involved in all accidents and fatal accidents are displayed in Figures 22 and 23. Compared to their involvement in all accidents, motorcycles and heavy trucks are overrepresented in fatal accidents. Motorcycles offer little protection to motorcycle riders involved in accidents, and heavy trucks tend to be involved in more severe accidents due to their large size. The number of accidents in each body style group is provided in the table below.

BODY STYLE OF VEHICLES IN ACCIDENTS		THIS YEAR			PERCENTAGE CHANGE OVER LAST YEAR

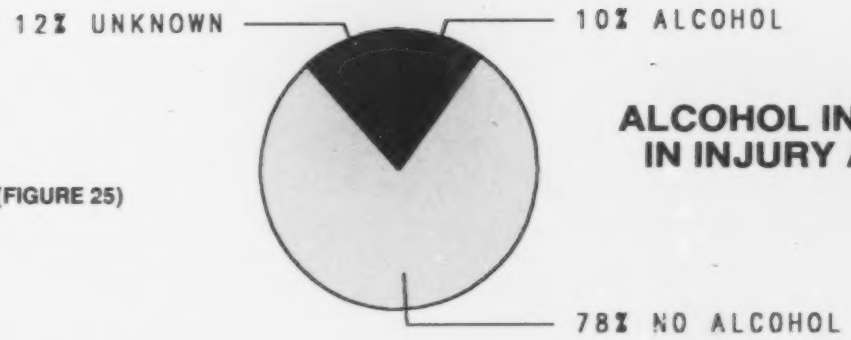
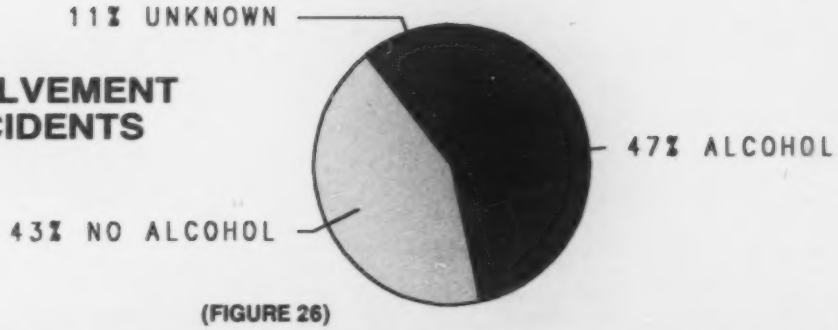
ALCOHOL INVOLVEMENT IN PDO ACCIDENTS

(FIGURE 24)



ALCOHOL INVOLVEMENT IN INJURY ACCIDENTS

(FIGURE 25)

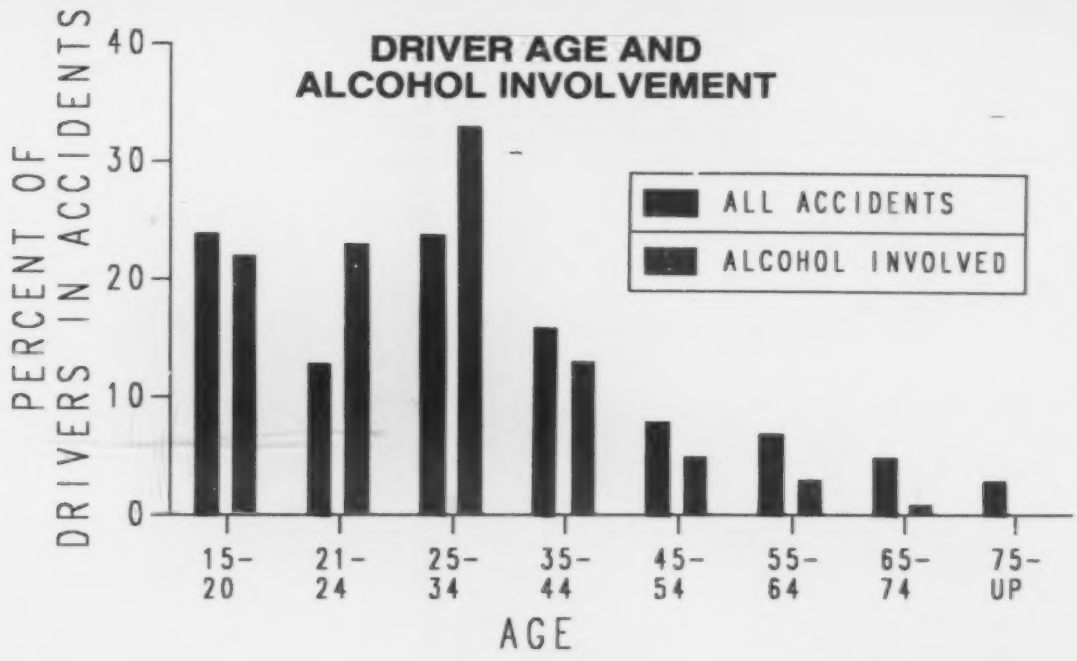


ALCOHOL INVOLVEMENT IN FATAL ACCIDENTS

(FIGURE 26)

Figures 24, 25, and 26 show the relationship between alcohol involvement and accident severity. As accident severity increased, so did alcohol involvement. In 1988, 47% of all fatal accidents in Nebraska involved alcohol. This figure is up from 38% in 1987. The National Traffic Safety Administration reports that 49.3% of fatal traffic accidents in the United States, in 1988, involved alcohol. If you consider that some of the 10.0% of fatal accidents with unknown alcohol involvement in Nebraska, in 1988, probably were alcohol related, then Nebraska's percentage gets closer to the national average. (Alcohol testing is only required for fatal accidents, thus, actual alcohol involvement in injury and PDO accidents may also be higher than is shown.)

(Note: Due to rounding, the total percentages do not equal 100% in Figure 26.)



(FIGURE 27)

The relationship between driver age and alcohol involvement in motor vehicle accidents is illustrated in Figure 27. Compared to their involvement in all accidents, drivers aged 21 to 34 are overrepresented in alcohol related accidents. In fact, these drivers are in 55.5% of alcohol involved accidents. Drivers aged 21-24 are most overrepresented, being involved in 22.7% of alcohol related accidents but only 12.9% of all accidents. Note that drivers between the ages of 15 and 20 are in 21.7% of alcohol related accidents, despite the fact that the legal drinking age in Nebraska is 21.

AGE OF DRIVER	TOTAL		FATAL		INJURY

(TABLE 9)

CONTRIBUTING CIRCUMSTANCES

CONTRIBUTING CIRCUMSTANCES IN ACCIDENTS

In 1988, there were 39,398 reportable motor vehicle traffic accidents in Nebraska with 66,112 drivers. In an effort to determine why an accident occurred, officers investigating an accident cite the "major contributing circumstance." Only one contributing circumstance is recorded for each accident. Most accidents are the result of improper driving. The table below lists some of the contributing circumstances reported and the number of accidents they were reported for in 1988.

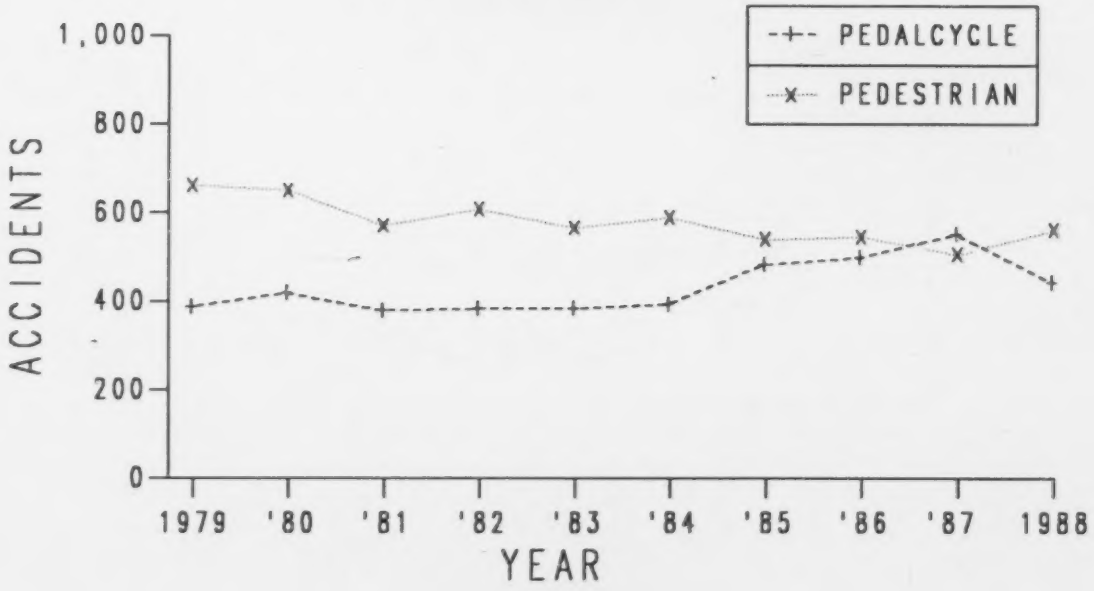
CIRCUMSTANCE	NUMBER OF TIMES REPORTED	PERCENT (%) OF TOTAL
Failure to Yield	7,952	22.6
Speed too Fast for Conditions	3,079	8.8
Evasive Action	1,913	5.4
Following too Closely	4,195	11.9
Alcohol or Drugs	1,429	4.0
Backing Unsafely	1,412	4.0
Drove Left of Center	820	2.3
Made Improper Turn	1,047	3.0
Disregarded Traffic Signal	1,420	4.0
Other Improper Driving	6,971	19.8
Animal on Roadway	2,351	6.7
Other*	2,654	7.5
Total	**35,243**	**100%**

** Includes: exceeding speed limit, improper overtaking, ran stop sign, improper or no turn signal, and improper lane change.*

PART III
ACCIDENT TRENDS

PEDESTRIAN AND PEDALCYCLE

PEDESTRIAN AND PEDALCYCLE ACCIDENTS

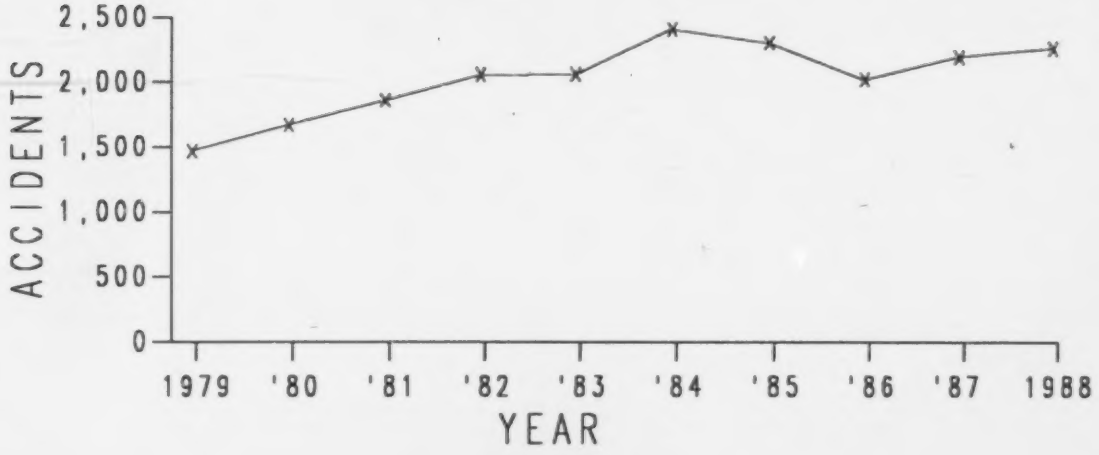


(FIGURE 28)

Figure 28 represents the number of pedestrian and pedalcycle accidents in Nebraska, over the past 10 years. Pedestrian accidents are up from 510 in 1987 to 562 in 1988. Pedestrian fatalities are also up, from 14 in 1987 to 22 in 1988. However, pedalcycle accidents are down. There were 439 in 1988, compared to 547 in 1987. Pedalcycle fatalities are the same as 1987 - 4.

* *Pedalcycle - A vehicle operated solely by pedals, and propelled by human power. Includes bicycle, tricycle, and unicycle.*

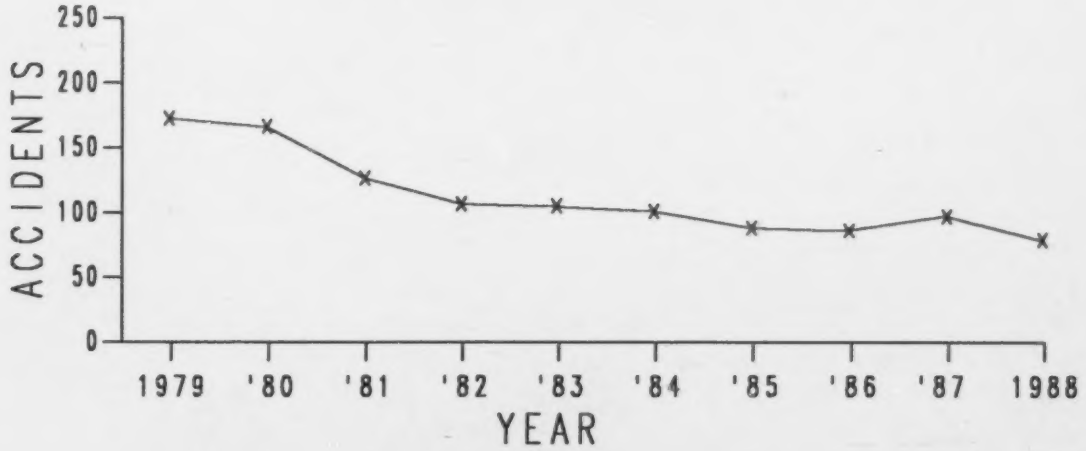
ANIMAL ACCIDENTS



(FIGURE 29)

The number of accidents involving animals, over the last 10 years, is depicted in Figure 29. Animal accidents have generally increased through the period, up 3% from 1987. This rise may be partly in response to a growing deer population in Nebraska. Deer are the most frequently involved animals in motor vehicle-animal accidents.

RAILROAD ACCIDENTS



(FIGURE 30)

The number of railroad accidents for 1988 is down 5 accidents from 1987. There has been a general downward trend in railroad accidents since 1979. In 1988, 8 people died in 80 motor vehicle/train accidents in Nebraska.

BODY STYLE

The four most common body styles of vehicles involved in traffic accidents are passenger cars, light trucks or pickup trucks, heavy trucks and motorcycles. The percentage of accidents that each of the four body styles have been involved in, since 1979, is shown in the following two graphs. The percentage of traffic accidents involving light trucks has generally been increasing. The combined percentage of accidents involving passenger cars, heavy trucks and motorcycles has been decreasing slightly.

(Note: In any one year, the combined percentages of passenger cars, light trucks, heavy trucks and motorcycles will not total 100%. The percentage of "other" body styles, like buses, is not shown.)

Message from the Director...

"Serving Nebraska's children and families in their time of need" continues to be the guiding principle of the Department of Social Services. That ideal is reflected in the wide variety of initiatives that were undertaken by the Department to improve the quality of family and community life.

The accomplishments of the Community and Family Preservation Teams are exemplary. The Family Preservation Teams in the five pilot communities of Scottsbluff, Lincoln, Broken Bow, Grand Island, and Beatrice can claim an ever-deepening commitment by their communities to helping families in need. Because of the positive experiences of these teams, the Department has sent Community Development Specialists to four additional community teams. One focuses on Black families in the Omaha community, and another, the Nebraska Indian Child and Family Consortium, works with Nebraska's Native American population. Other teams will be established in Lexington and Norfolk to provide community-based, family-centered services in these communities.

Our Family Therapy Program continues to flourish. Currently, the Department has ten permanent family therapists on staff and thirteen private therapists under contract. Family therapy is one of our most valuable services to families. From 70 to 80 percent of the families served indicate positive changes in their lives have occurred as a direct result of the therapists' work.

Nebraska was selected as one of 13 states to participate in Youth 2000, a federally funded program designed to target and train nontraditional leaders found among our young people. Nebraska's program gathered over 60 young men and women, who had been identified by a variety of community groups and schools, in Aurora late last summer. They learned to appreciate their own talents and were taught leadership techniques. They learned how to make themselves heard in a positive way by adults. These young people were then charged with taking their new skills home to recruit and work with their peers to bring about change. Most communities have responded by not only listening to them but also by passing resolutions which the youth have promoted. I am pleased to report that the process is continuing.

The Department has established and begun to implement a new Family and Child Welfare policy. Whereas policy formerly focused primarily on children's needs, the new policy focuses on the needs of children in the context of the family system. When this shift in focus is coupled with implementation of case management, we will be better able to meet our goal of serving children and families.

In June of 1988, the Department contracted with private consultants to conduct an extensive analysis of the foster care system. Because an ever-increasing number of Nebraska's children will need specialized foster care, the results of this study are essential to the development of our foster care services. If we are going to offer a sound continuum of care to Nebraska's children and families, we must take a proactive approach to the challenges of foster care. The results of this study offer a substantive beginning.

Another important milestone is the Aged and Disabled Waiver, which will provide family-centered, community-based alternatives to institutional care for many aged and disabled persons. A primary focus of the waiver is a case management system which will structure client access to ensure their needs are fully satisfied in the least restrictive setting. The waiver services will be purchased with Medicaid funds.

Finally, the Family Support Act, signed into law by President Reagan, is one of the most significant opportunities available for us to really help those we serve take the first step toward self-sufficiency. This Act provides us with the opportunity to expand the training options available through a coordinated effort with the Labor Department and the three service areas of the Joint Training Partnership Act (JTPA). It also offers communities the opportunity to develop educational and training components that respond to their local needs.

While the Department has anticipated many of the elements of this Act in our Job Support and Child Support Programs, the implementation of this legislation will change the way we think about welfare. Welfare payments will become the support necessary while the family is in training to enter the labor market. This Act also places a great deal of emphasis on the need for young parents to return to school to complete their high school education and to develop the basic reading and math skills necessary for them to be successful in a training or employment setting.

This list of milestones is certainly not exhaustive, for there are other plausible candidates such as the interagency collaboration on behalf of Nebraska's children and families. Undoubtedly, our most important accomplishments are achieved in working with our clients. When a family in need of food receives food stamps, when a mother finds employment through Job Support, or when a family is pulled together with the help of a therapist, we can be proud.

Our families are our future. In our work with children and families, we must continue to assist them in improving the quality of their lives by building on their strengths.

"The family is our refuge and springboard; nourished on it, we can advance to new horizons. In every conceivable manner, the family is link to our past, bridge to our future."

Alex Haley, Author of **Roots**

*All families have strengths. By building on these strengths they can reach their full potential. Research shows that families who survive the turmoil of daily life and grow share some common traits. On the following pages are listed six of the more common traits and their descriptions.**

* *Taken from*
Achord, Bill, et al.
Building Family Strengths: A Manual for Families.
University of Nebraska — Lincoln, Lincoln, NE, 1986.

Family commitment is

- *accepting and forgiving the mistakes and faults of each other.*
- *investing time and energy on the family's daily activities.*
- *sacrificing worthy causes to put the best interest of the family first.*
- *being there for each other through thick and thin.*
- *an expression of love.*

54957-1-a

Nebraska Department of Social Services

Annual Report 1988

Family wellness is

- *a sharing of common values among family members.*
- *concern for the needs and welfare of each other.*
- *being able to grow through the resolution of conflicts and problems.*
- *expressed through kindness, patience, and forgiveness.*
- *helping each other grow beyond self to become part of something larger.*

Family communication is

- *actions as well as words.*
- *sharing joys, sorrows, and hopes for the future.*
- *laughing together.*
- *an understanding that leads to empathy.*
- *listening with the heart as well as the head.*

Family strategies are

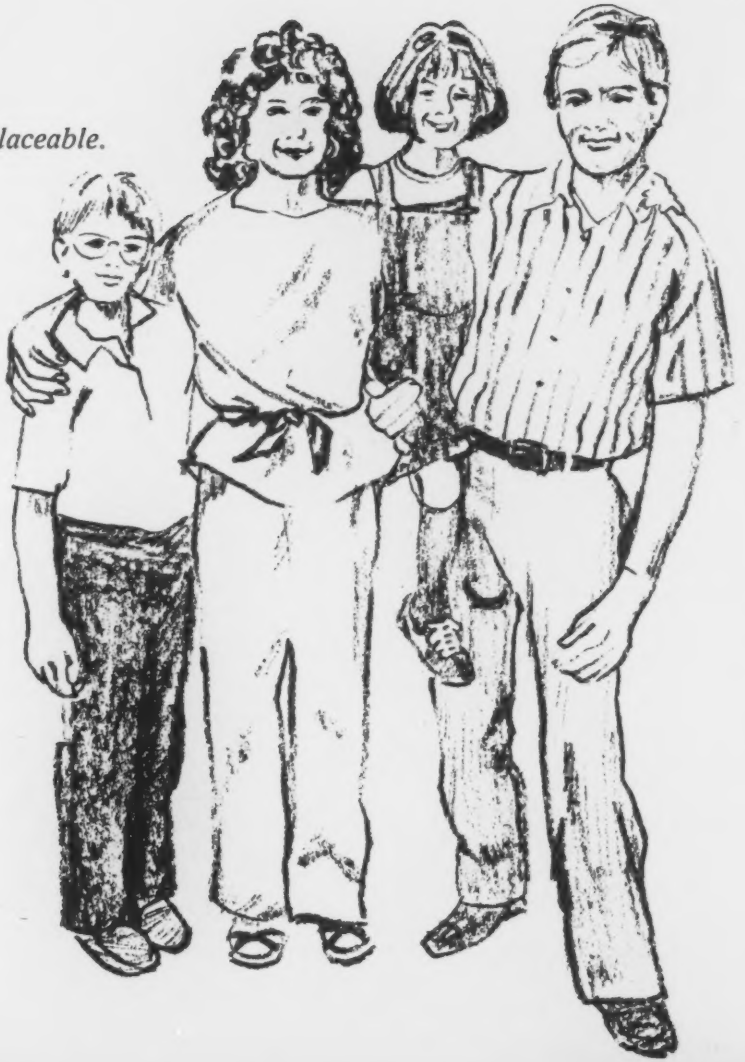
- *developing constructive ways to deal with stress, crises, and conflict.*
- *replacing worry with pleasant, relaxing activities.*
- *developing a sense of humor.*
- *having a sense of purpose beyond ourselves.*
- *drawing on inner resources.*

Family time together is

- *doing many, different things together.*
- *enjoying the company of each other.*
- *developing the traditions that have special meaning and give a family a sense of continuity through history.*
- *giving good things a chance to happen.*
- *involving every family member in planning and doing.*
- *making memories to share.*

Family appreciation is

- *accepting others and yourself as worthy and lovable.*
- *helping other family members feel good about themselves.*
- *building each other up through patience and kindness.*
- *focusing on the good qualities of each other.*
- *telling each family member he/she is very special and irreplaceable.*



Agency Programs

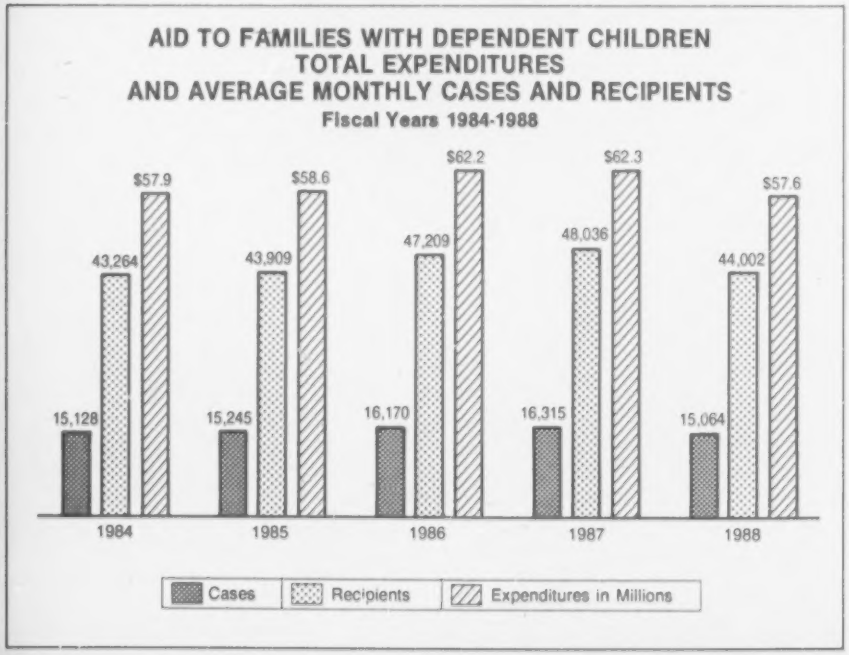
PUBLIC ASSISTANCE AND RELATED PROGRAMS

Aid to Dependent Children Program

The Aid to Dependent Children Program (ADC) provides financial assistance to families with minor dependent children. To be eligible, a child must be deprived of parental support because at least one parent is deceased, disabled, unemployed, underemployed, or, as in the majority of cases, absent from the child's home. In addition, the family must have little or no income. When a family applies for ADC benefits, the child's caretaker (who is usually the mother) must agree to provide documentation that her description of the family's situation is true, register for the Job Support Program, and cooperate in child support enforcement efforts.

In FY 1988, the average number of families receiving ADC each month was 15,064, and the total annual benefits paid were $57,622,815. The average payment per family per month was $318.77 or $109.13 per individual.

The average number of families receiving benefits each month was 7.7 percent less than in 1987, and the cost of benefits was 7.5 percent lower.



ADC expenditures are supported by both federal and state general funds. The federal match for FY 1988 was approximately 59 percent, and the state share was 41 percent.

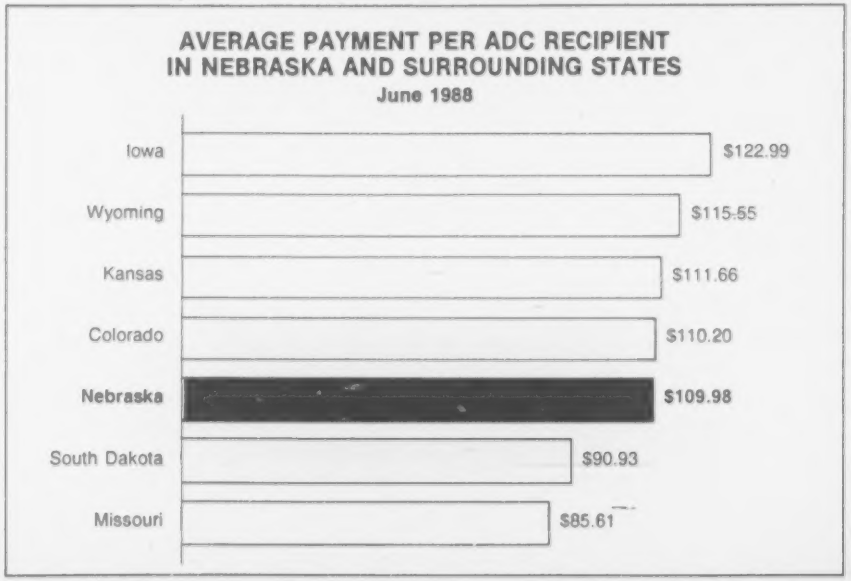
The standard of need was raised in July of 1988, the first increase since 1981. The standard increased from $350 to $364 for a family of three.

Job Support Program

The Job Support Program is designed to assist ADC recipients in seeking employment through a program of training, education, and work experience, coupled with supporting social services.

If a family includes two adults who are not disabled, at least one must register for the Job Support Program. If the family's youngest child is six months old, adults not exempt for another reason must also register. Persons who are exempt from required registration may volunteer.

The Job Support Program is multifaceted. One of its principal components is the job-seeking skills workshop. These workshops run ten days. The first five days concentrate on building self-esteem and learning job-search skills, and the second five days are spent phoning potential employers to schedule interviews. After graduation, workshop graduates join a Job Club. Club members meet once a week to continue setting up



interviews until employment is secured. Job Support has other components in which participants may attend school or vocational training. If a participant is unable to enroll in one of these components because of personal problems, special assistance is available.

Financing for this program comes from Title IV-A and Title IV-C of the Social Security Act and matching state funds. Expenditures during FY 1988 totaled $2,595,205, an increase of 19.0 percent over 1987.

Child Support Enforcement Program

The Child Support Enforcement Program is becoming increasingly important in helping families become and remain independent. If absent parents (usually fathers) were paying their court-ordered child support, and if, in those cases where there is no court order, court orders were secured and enforced, a very significant number of families would no longer rely on public assistance.

The Department, through its own staff and contractual arrangements with county attorneys and clerks of the district courts, continues its efforts to obtain and enforce child support court orders.

When a family applies for ADC, the mother (or other caretaker) must agree to assign any court-ordered child support to the state. The parent must also agree to cooperate with the Department in determining the paternity of the children, locating absent parents, and obtaining court orders for support. Child Support collections are used to offset ADC expenditures.

The Department has developed a variety of means for collecting delinquent child support. The Department can intercept state and federal income tax refunds and unemployment insurance benefits and require employers to withhold a portion of an absent parent's wages to pay delinquent support.

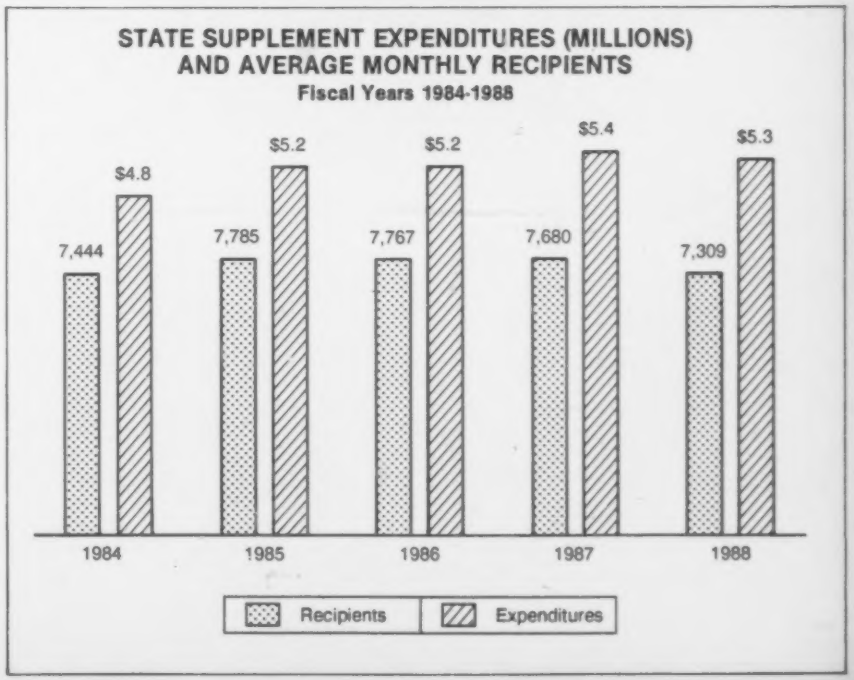
The full range of Child Support Enforcement services is also available to families not receiving ADC. By assisting them, it is hoped the program will help such families avoid becoming public assistance recipients.

During Federal Fiscal Year (FFY) 1988, $7,007,831 was collected on behalf of families receiving ADC, and $37,861,748 was collected on behalf of Non-ADC families. This is a 5 percent and 20 percent increase respectively over FFY 1987. Of these amounts, $2,142,290 was intercepted from IRS returns, $141,683 intercepted from state revenue funds, and $304,147 from unemployment benefits. This amounts to a 86 percent increase, 32 percent increase, and 5 percent decrease respectively over FFY 1987. Wage withholding amounted to $1,292,324 for ADC cases and $7,340,138 for Non-ADC families. These are increases of 21 percent and 41 percent respectively over FFY 1987.

State Supplement to SSI

Families with dependent children are not the only ones to receive cash assistance. State Supplement (AABD) funds money payments to aged, blind, and physically or mentally disabled clients as a supplement to federal assistance and other income. This program is intended to provide low-income individuals with sufficient income to meet their basic needs.

The primary source of cash assistance for these individuals is Supplemental Security Income (SSI), which is a federal program administered by the Social Security Administration. The Nebraska standard of need (the amount necessary for subsistence) was higher than the federal standard at the time SSI was implemented, and Nebraska continues to supplement SSI benefits using state funds. The State Supplement to SSI is administered by the Department of Social Services. Since state regulations differ somewhat from those governing the federal program, some persons receive State Supplement benefits who do not receive SSI. Total



State Supplement payments for FY 1988 were $5,279,027, a 2.3 percent decrease from the previous year. An average of 7,309 cases per month received an average payment of $60.19 per month. This was a 4.8 percent decrease in average caseload, and a 2.6 percent increase in average payment. The raises for this program are tied to increases in Social Security. In 1988, the standard of need increased to $257 plus a housing allowance of up to $140 for one person.

OTHER CASH ASSISTANCE PROGRAMS

There are three other cash assistance programs designed to help those with specific needs.

Emergency Assistance

This program is designed to provide financial assistance to needy families who have at least one minor child in the home and who are threatened by unforeseen crises such as shutoff notices from utility companies, imminent eviction from the family home, or lack of food. Emergency Assistance provides help through such means as grocery vouchers and direct payments to landlords or utility companies rather than cash.

This program can be utilized only if no other resources are available, and it can be used by a family only once in a twelve-month period.

In FY 1988, 7,137 persons received assistance totaling $439,315, a decrease in both persons (17.6 %) and expenditures (11.7 %) from last year.

Emergency Assistance is funded by county and federal monies and administered through the Department of Social Services.

State Disability

State Disability is a program designed to meet the subsistence needs of those who have a temporary disability. This program provides cash and medical assistance to persons whose physical or mental disability is expected to last from 6 to 12 months. (Social Security disability benefits cover those whose disability will last at least 12 months.)

An average of 61 persons per month received State Disability payments averaging $442.39 per person. The total amount spent on cash benefits during FY 1988 was $323,828, a 7.7 percent decrease from fiscal year 1987.

This program is entirely funded from the state general fund.

Refugee Resettlement Program

This program provides assistance to refugees who have come to the United States, who are in need of help, but who are not eligible for any other type of assistance program. Refugees are eligible for this program for a period of 12 months beginning with their date of entry into the United States. It is hoped this assistance will allow refugees the time either to learn or improve their English language skills or to participate in schooling or training to prepare them for employment.

In FY 1988, maintenance expenditures of $89,607 were spent on an average of 29 cases per month. This is a 14.7 percent decrease in persons served, and a 22.1 percent decrease in monies spent from FY 1987.

This is a federally funded program.

Each of these three programs provides medical assistance in addition to cash payments. The statistics on the medical portions of these programs will be reflected in the Medical Assistance section of this report.

LOW INCOME ENERGY ASSISTANCE

This program provides cash assistance to those households unable to pay the costs of home energy. Heating assistance is available for any household meeting the program's income and resource guidelines. Cooling assistance is limited to households that have a member who is at least 70 years of age or who has a medical condition that requires air conditioning.

Also, this program provides funding for home weatherization projects administered through the Nebraska State Energy Office.

From November 1, 1987 through June 30, 1988, $9,376,113 in heating payments were made to 35,697 households. This is a 1.4 percent decrease in expenditures and a 5 percent increase in households served compared to the previous fiscal year. As of June 30, 1988, $558,555 in cooling payments were distributed to 5,504 households. This is a 2.6 percent increase in monies spent and a 11.2 percent increase in households served over the previous year.

Of the households receiving heating assistance, 6,791 included at least one elderly person, and 4,199 included at least one handicapped person. These are increases of 4.8 percent and 13.6 percent, respectively, over 1987. Of the households receiving cooling assistance, 4,851 included an elderly person and 584 a handicapped person. These are increases of 6.5 percent and 51.7 percent, respectively, over 1987. (Eligibility for cooling payments requires a documented medical need.)

While administered by the state, funding for this program comes from federal block grant funds.

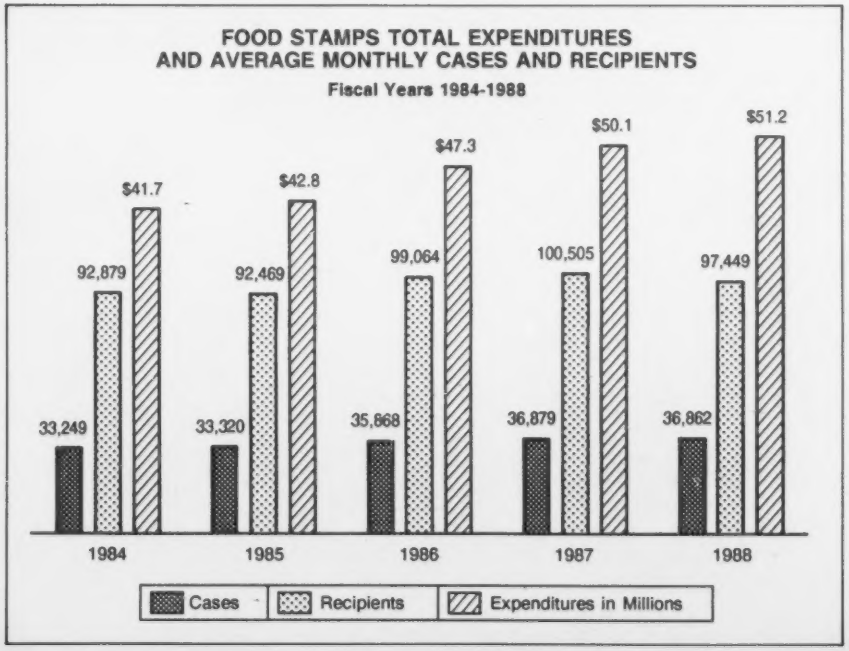
FOOD PROGRAMS

Food Stamps

The Food Stamp Program is intended to increase the purchasing power of low-income households, so they can buy a nutritionally adequate low-cost diet. The Food Stamp Program is the primary federal program for providing food assistance to low-income households in the United States.

Eligibility for participation in this program is determined primarily through national criteria established in three broad categories: income, assets, and work requirements. All of these criteria must be satisfied to be eligible to participate.

Additional limitations on participation relate to noncitizens, aliens, strikers, college students, and those who voluntarily quit their jobs.



At the federal level, the program is administered by the U.S. Department of Agriculture's Food and Nutrition Service. At the state level, the Food Stamp Program is administered by the Department of Social Services.

In an average month during FY 1988, 97,449 persons in 36,862 households received Food Stamps. This included 11,713 households in which all members received ADC and 25,149 other households. The number of participating households was almost identical last year, while the number of persons was 3 percent less. The total value of Food Stamps for the year was $51,215,979, with the average value per household of $115.78 per month.

Food stamps are purchased with federal funds, and the cost of administrating the Food Stamp Program is split—50 percent state general funds and 50 percent federal funds.

Special Commodity Distribution Program

Another program that assists low-income families with a nutritional, low-cost diet is the Special Commodity Distribution Program. The U.S. Department of Agriculture purchases certain surplus commodities through price support programs and designates them for distribution to low-income families. Distribution sites are set up throughout the state once each quarter, and volunteers coordinate the distribution of the surplus commodities.

To be eligible for this program, the family's income must be less than 150 percent of the poverty level. Eligibility requirements for this program are less stringent than for most programs.

An average 94,707 households were served each quarter in FY 1988, a decrease 5.6 percent from 1987. The products distributed during FY 1988 are as follows:

Commodity	Pounds	$ Value
Butter 32 lb. cases	4,480	$ 6,731
Butter 36 lb. cases	291,168	437,480
Processed Cheese	2,126,850	3,062,664
Cornmeal	257,800	34,803
Flour	651,600	78,583
Honey	352,188	274,707
Nonfat Dry Milk	414,216	420,429
Rice	808,128	160,615
Total	**4,906,430**	**$4,476,012**

This program was funded by $261,920 from a federal grant. Additional funding comes from the Community Services Block Grant discretionary fund.

Food Distribution Program

The Food Distribution Program is the primary commodities distribution program operated by the Department. The source of the food products is the U.S. Department of Agriculture's purchase of surplus commodities. The food, which is distributed to institutional feeding sites rather than directly to individuals, is not solely for the use of low-income individuals. Food is distributed to schools, child-care agencies, charitable and correctional institutions, nutrition programs for the elderly, summer camps, and special summer feeding programs.

In FY 1988, food was distributed for daily meal service to 172,348 children in child nutrition programs (primarily school hot lunches), 9,865 persons in institutions, and 8,349 individuals in nutrition programs for the elderly. This represents a decrease of 1.6 percent and increases of 7.2 percent and 10.9 percent, respectively, over 1987. A total of 11,279,439 pounds of food was distributed to the recipient agencies at a cost of $721,568 (6.4 cents per pound of food) for warehouse and transportation charges.

While there is no cost to the state for the food itself, storage and transportation was paid from a revolving fund which is funded by the program recipients. The cost of administration of this program is paid from state general funds which were supplemented by a federal grant of approximately $50,000 in 1988.

MEDICAL ASSISTANCE

Medicaid

For the poor, a principal obstacle to a healthy life is the high cost of medical care. The Medicaid Program (Title XIX of the Social Security Act) is designed to provide coverage for medical care to families and individuals receiving cash assistance through ADC, SSI, or the State Supplement Program. Also, people whose incomes are sufficient to cover their living expenses except for medical care may receive Medicaid coverage if they meet certain eligibility criteria.

In addition, beginning on or after July, 1988, recent federal changes have allowed medical coverage for new groups, including—

- Pregnant women with income at or below the federal poverty level. (A qualified medical provider may determine initial eligibility.)
- Children age 2 or younger with income at or below the federal poverty level. (Effective October 1, 1989, 3 year olds will be covered.)
- Former ADC grant recipients with income less than 185 percent of the federal poverty level.
- Aged, blind, or disabled individuals with net income at or below 85 percent of the federal poverty level.

MEDICAID NET EXPENDITURES
Fiscal Years 1987-1988

Expenditures	Fiscal Year 1987	Fiscal Year 1988
Medicaid Vendor Payments	$206,080,601	$234,014,476***
Medicare Part B (SMIB) Premium Payments	1,333,278	1,804,394
Direct Vouchers	106,648	740,813
Adjustments for:		
Nursing Homes	41,704	17,651
Hospitals	24,298	537,242
Prior Period Refunds*	2,036,525	2,646,603
Total Expenditures	**209,491,050**	**239,761,179**
Refunds		
Refunds and Cancellations	1,414,024	2,099,824
Adjustment for DPI Non-Federal Share**	7,196,766	7,980,526
Total Refunds	**8,610,790**	**10,080,350**
Net Expenditures	**$200,880,260**	**$229,680,829**

* Refunds applying to payments prior to July 1, 1987 included in services expenditures above, do not reduce current year payments.
** For DPI's share of ICF-MR and Inpatient Mental Hospital services paid for by the Department of Social Services through Title XIX.
*** The federal share of payments to DPI for ICF-MR Waiver services and case management totalling $4,572,824 is included.

All Medicaid information presented in tables and charts in this publication represents Medicaid direct vendor expenditures during the year unless otherwise noted. Medicaid direct vendor expenditures are all Medicaid expenditures except retroactive adjustments to hospitals and nursing homes, Medicare Part B premium payments, direct voucher payments and amounts recovered from refunds and cancellations. All information covers payments made during the year, rather than actual services provided during that period.

Inpatient and outpatient hospital services, visits to physicians, prescription drugs, dental and eye, and nursing home care are among the wide range of medical services covered under the Medicaid Program. Not surprisingly, this program is very costly. In fact, it is the most costly program administered by the Department of Social Services. The most costly item in the Medicaid budget is nursing home care for the elderly and disabled: it comprises nearly half of the Medicaid Program's total cost.

In FY 1988, the gross cost of the Medicaid Program was $229,441,652, an 11.3 percent increase over fiscal year 1987. Direct payments to providers were made on behalf of an average of 50,103 persons each month this year, compared to 48,880 last year. This is an increase of 2.5 percent.

Nursing home services and inpatient hospital services accounted for 46.1 percent and 24.0 percent, respectively, of the total dollars paid directly to providers. The most frequently used services were physicians' services and prescription drugs. They were used by an average of 24,933 and 31,786 persons, respectively, each month.

Medicaid is funded on the basis of an approximate 60 percent federal and 40 percent state match.

Fiscal Year 1988

* Includes Foster Care Children

Other Medical Assistance Programs

Three other medical programs provide cash and medical assistance to specified groups of people. The range of services offered is the same as those provided by Medicaid.

State Disability provides cash assistance and medical services to persons with a disability expected to last at least 6 months, but less than 12 months. In FY 1988, a total of $1,303,067 in state funds was spent for medical services for an average of 77 persons per month. Expenditures decreased 22.7 percent from fiscal year 1987, and the number of persons served decreased 28.7 percent.

The Catastrophic Illness Program provides medical services to families with children in crisis situation. During FY 1988, expenditures totaled $42,539. This was an increase of 69.6 percent from the previous year.

Funding for Catastrophic Illness is 25 percent county funds, 25 percent state funds, and 50 percent federal funds.

The Refugee Resettlement Program is the third program. In FY 1988, a total of $62,052 in federal funds was spent to buy medical services for an average 35 persons per month. This compares to expenditures of $50,693 for a monthly average 36 persons last year.

Medically Handicapped Children's Program

Children with a handicapping or potentially handicapping condition may receive medical services through the Medically Handicapped Children's Program (MHCP). In addition to other eligibility criteria, the families of children who wish to use this program must have low incomes before they qualify for services.

An important feature of this program is its traveling clinics. Periodically, medical specialists travel across the state to offer their expertise to handicapped children who qualify. Many volunteers, especially the Nebraska Elks Association, help make arrangements for these clinics.

Expenditures for the year totaled $1,645,958, a decrease of 7.5 percent from last year. The SSI-Disabled Program expenditures were $108,722 (an increase of 113.2 percent over last year); these expenditures are not included in the Medically Handicapped Children's Program expenditures total.

Funding for this program comes from a portion of a federal block grant and the state general fund.

MEDICALLY HANDICAPPED CHILDREN CLINICS AND HOSPITALIZATIONS
Fiscal Year 1988

Outpatient Surgeries	139		

SERVICES TO FAMILIES AND CHILDREN

Title XX Services to Families

Title XX services are designed to help families in crisis achieve and maintain financial independence and a healthy home environment.

Day care services, as with all Title XX services, are available to the following families: families receiving ADC and families with incomes well below the poverty line, but not receiving ADC. (Day Care services are available, on a sliding fee scale basis to families with incomes near the poverty line.) Families are eligible for day care only if the caretaker is attending school or job training, looking for a job, obtaining necessary

medical or rehabilitative services, or working at a job. Day care services are also provided to families where child abuse or neglect has occurred. In these cases, day care is provided without regard to the family's income.

Transportation services are provided to take family members to and from day care, health care, and community services. Also, these services are available to take families of state wards to receive services related to reunification of the family.

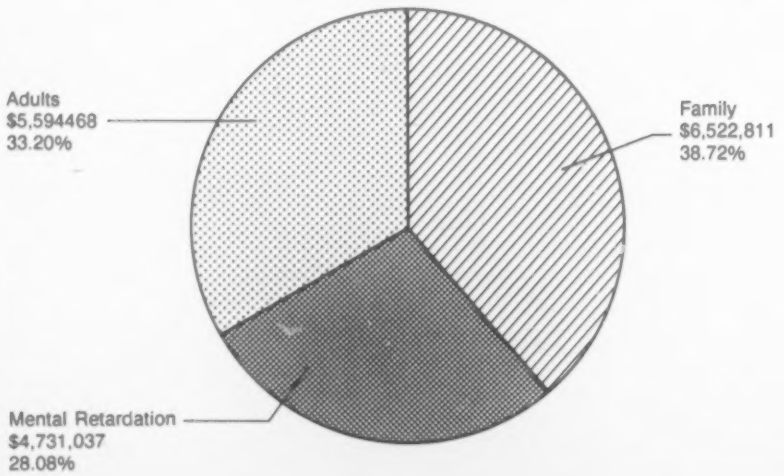
Homemaker services, for which the Department contracts with private providers, offer instruction and assistance in a variety of ways. Often family problems can be caused or made worse because the adults in the family lack the skills necessary to manage a household. This program is designed to provide some of these necessary skills: household management skills (such as purchasing and budgeting), care and supervision of children, food preparation, personal care and hygiene, and ways to obtain proper medical care.

Family Support, a more intensive form of homemaker services, is available to families of Department wards who were neglected or abused and to families in which the parents are minors. The Family Support Program stresses the development of decision-making and relationship-building skills. This service is one of the principal components of the Department's efforts to prevent the placement of children outside of the home and to reunite families with children already placed outside the home.

In FY 1988, services to children and families were provided to 19,572 persons at a cost of $6,522,811. This is an increase of 13.3 percent in persons and an increase of 11.2 percent in expeditures over FY 1987. Day care services were provided to an average of 4,848 children per month at an average monthly cost of $89.04 per child, compared to 4,428 children and $87.62 the prior year.

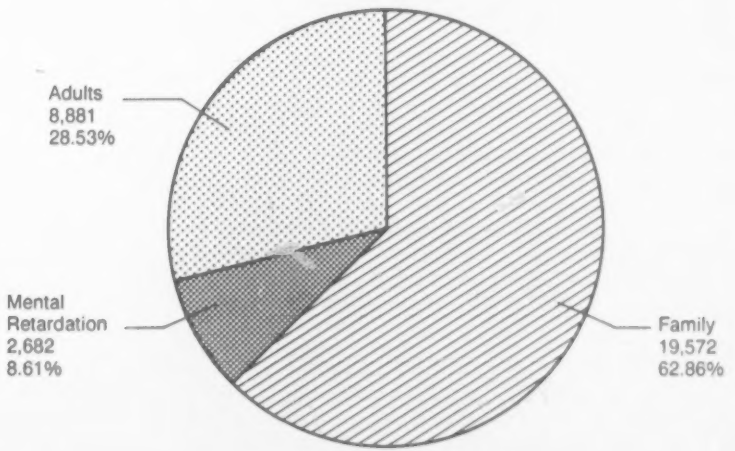
These services are funded by a federal block grant, which is supplemented with state funds.

TITLE XX
CONTRACTED EXPENDITURES
Fiscal Year 1988



Total Expenditures of $16,848,316

TITLE XX
UNDUPLICATED PERSONS RECEIVING PURCHASED SERVICES
Fiscal Year 1988



31,135 Unduplicated Persons Receiving Services

Child Protective Services

The services of this program are offered to families where suspected child abuse or neglect has been reported. When the health or welfare of the children is endangered by the actions of the parents or other adults responsible for the care of the children, the Department investigates.

If child abuse and/or neglect is found present, and if there is a high risk of harm to the child, a child protective service worker may recommend to law enforcement authorities and the court that the child be removed temporarily from the home for the child's protection. Regardless of whether or not the child is removed, and regardless of whether or not the child protective service worker substantiates the report of abuse or neglect, the worker visits with the family to help determine what factors could have contributed to the report being made. If needed, the worker helps the family develop a plan to eliminate or, at least, minimize the family's problems.

Out-of-Home Services for State Wards

If a child/youth has been severely abused or neglected, or if a child/youth, for some other reason, becomes totally dependent on the Department for his/her care, the Department may be given legal custody of him/her. A child/youth can become a state ward either through adjudication of a court or by voluntary relinquishment by the parents. Also, a child/youth can become a state ward because he/she is a status offender. (A status offender is a minor whose actions, for example truancy or ungovernable behavior, would not be illegal if he or she were 18 years of age or older.) A few youth can become state wards when they are convicted of a misdemeanor or felony.

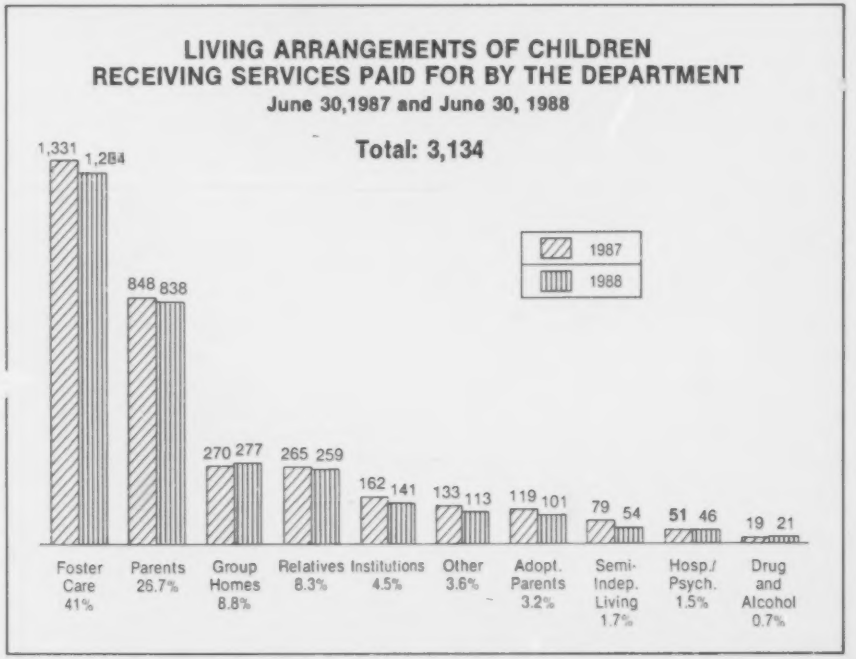
Out-of-home care is 24-hour substitute care for children and youth until they can be returned to their families, placed in adoptive homes, receive a legal guardian, or reach the age of majority. It includes the care provided in foster homes, group homes, institutional settings, and independent living arrangements.

Typically, out-of-home care consists of placement in a foster care home. When appropriate to their needs, the Department attempts to place children / youth in the most family-like setting possible and as close to their home community as feasible.

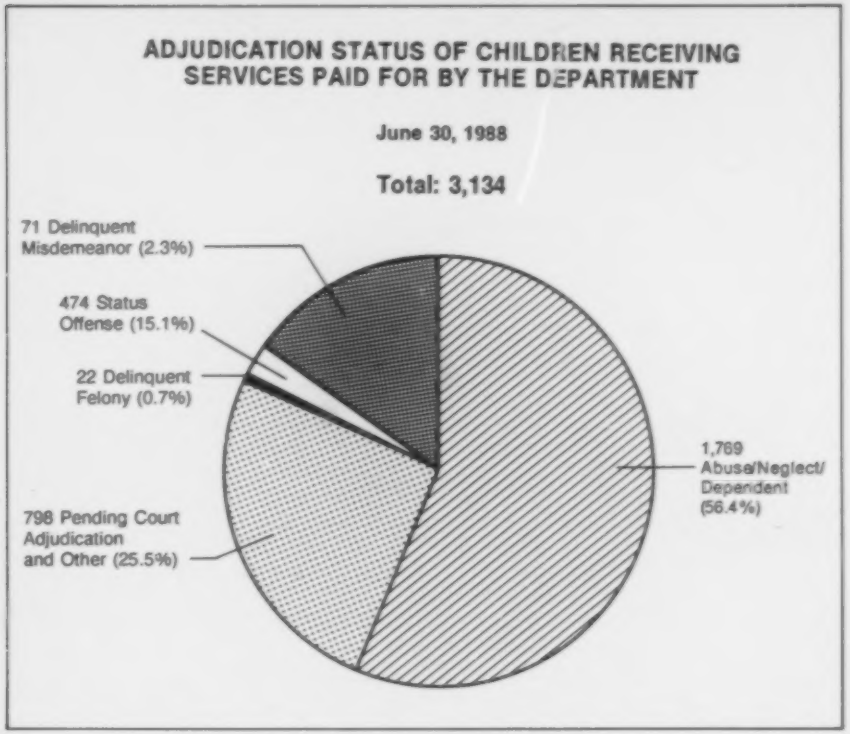
The goals of out-of-home services are: to prevent and / or remedy neglect, abuse, or exploitation; where family rights are intact, to support the biological family and work for family reunification; and if family rights are terminated, to secure permanent families through adoption or guardianship.

Out-of-home care services are available to wards of the Department and their families regardless of income. The services provided include family therapy (see "Home-Based Services"); case management (family assessment, development of case plan and service agreements, appropriate placement of children, and periodic review and reassessment of case plan); supervision and services for children in placement; and if in the best interest of the child, initiation of action to terminate parental rights.

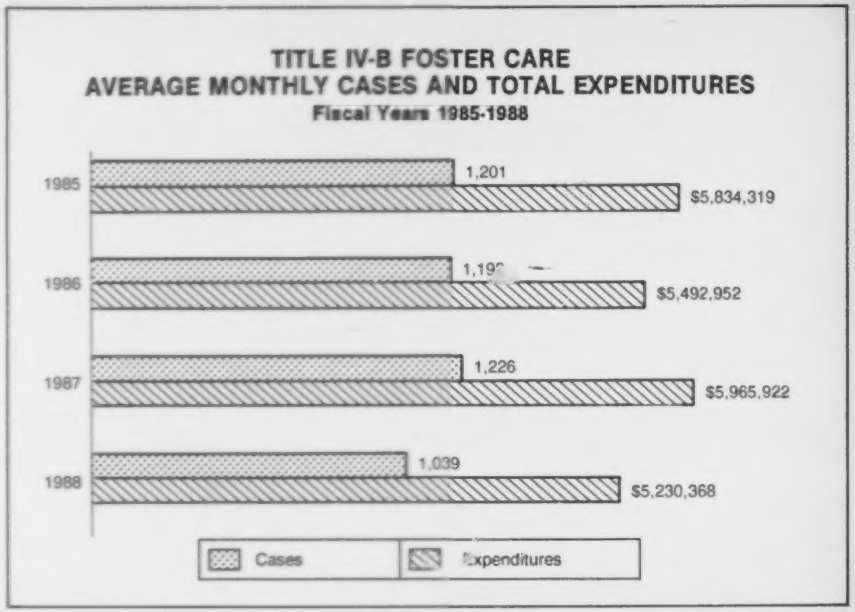
The bar graph below shows the living arrangements of Nebraska's state wards as of June 30, 1988.



Funding for services to children placed out-of-home is available from two sources. Title IV-E Foster Care is for children who would be eligible to receive ADC if they were in their biological parents' home. In FY 1988, maintenance payments were made on behalf of an average 908 children per month through this program, an increase of 42 children per month from FY 1987. The total cost of maintenance for the year was $3,868,403, which is an average $352.54 per child per month. This is a 14.6 percent increase in total payments and a 8.7 percent increase in average payment per child over fiscal year 1987. Additional payments supplementing maintenance payments are also made. Title IV-E payments are federal and state funded at the Medicaid and ADC matching rates.



ADJUDICATION STATUS OF CHILDREN RECEIVING SERVICES PAID FOR BY THE DEPARTMENT
June 30, 1988
Total: 3,134
71 Delinquent Misdemeanor (2.3%)
474 Status Offense (15.1%)
22 Delinquent Felony (0.7%)
798 Pending Court Adjudication and Other (25.5%)
1,769 Abuse/Neglect/ Dependent (56.4%)



Title IV-B Foster Care covers children who would not be eligible for ADC if they were living in their biological parents' home. Maintenance payments were made on behalf of an average of 1,039 children per month through this program, a decrease of 187 children per month from FY 1987. The total cost of maintenance for the year was $5,230,368, which is an average of $463.81 per child per month. This is a 12.3 percent decrease in total payments and a 14.3 percent increase in average payment per child compared to FY 1987. In addition, special needs payments are made through this funding source to cover special requirements of State Wards. This program is funded with state monies and a limited amount of federal funds.

Home-Based Services

This program provides intensive therapy to an entire family over a period of weeks in the family's home. The therapists help a family strengthen its familial bonds and its ties to the community in which it resides. In general, the goal of the therapists is to assist families in overcoming whatever barriers could prevent the family from continuing to live together or from being reunited. The eligibility criteria for the services of this program are as follows: at least one child must be a state ward; there must be an active child protective service case; or the family has adopted a child through the Department, and there is an imminent risk to the adopted child of out-of-home placement. Most importantly, the family must be strongly committed to staying together.

The Department presently has 10 family therapists on staff, and it contracts with another 13 private providers.

Adoption Services and Subsidized Adoption

When it is not possible to return or maintain children with their biological families, adoption is the preferred goal. A subsidy is made available to remove barriers to adoption for children with special needs.

The Department of Social Services' Division of Human Services focuses on finding adoptive homes for children of all ages who have special needs. The children with special needs may be older; may need to be placed with one or more siblings; may be of a minority race; or may have special behavioral, emotional, or physical needs. Adoptive placements of the more traditional nature usually are made by private adoption agencies licensed by the Department.

As of June 30, 1988, there were 501 children receiving assistance through the Department's subsidized adoption programs. This represents a 11.3 percent increase in children from the end of the previous year. A total of $1,489,262 was spent during FY 1988 (a 2 percent decrease from FY 1987): $1,251,879 for maintenance, $73,288 for medical, and $164,095 for miscellaneous costs.

These services are supported by state and federal funds.

Education of State Wards

The Nebraska Legislature appropriates funds to assist school districts in providing educational programs to youth who are wards of the state (or any court) and who did not originally reside in that school district. This program is administered by the Department of Social Services.

Program funding for FY 1988 was $3,159,109 in state general funds, a decrease of 16 percent from FY 1987.

Licensing

The Department is responsible for licensing day care homes, group day care homes, day care centers, preschools, foster homes, group homes, child care agencies, and child placing agencies.

The table on page 36 presents the number of each type of facility that was licensed as of June 30, 1988.

Domestic Abuse Program

The Department helps fund 22 community-based groups which offer services to victims of domestic abuse and/or sexual assault and their families. The services provided include a 24-hour crisis hot line, shelter, transportation, medical and legal referral, crisis counseling, and emergency financial aid. Community groups use shelters, hotels, motels, and homes as safe havens for victims and their children. Also, these groups provide community education and training, so the dangers of domestic violence and sexual assault are better understood.

In FY 1988, funding available through the Protection from Domestic Abuse Act was $428,000. Funding through the Health Prevention Block Grant was $21,884.

AGED AND DISABLED SERVICES

Title XX Philosophy and Description

The Title XX Program is designed to assist clients attain or maintain the capability for self-support, self-care, and personal independence.

Due to Nebraska's rural nature, the Department has developed services that can be purchased from individual providers statewide. Title XX is built on the premise that local social service workers can identify needs and develop community resources to meet those needs. The Title XX Program maintains approximately 8,000 private providers under contract.

Title XX Adult Services

With the assistance of services purchased by Title XX, many adults who are elderly or disabled can continue living relatively healthy, independent lives in their own homes.

To be eligible, persons must be unable to perform certain necessary tasks for themselves, they must have no one else who can perform these tasks for them, and they must be able to maintain a greater independence if these tasks are performed for them.

The services made available are chore services, homemaker services, home-delivered and congregate meals, transportation, adult day care, and respite care.

Chore services include such tasks as housework, laundry, meal preparation, snow removal, yard maintenance, and assistance with bathing and dressing.

Home-delivered and congregate meals allow a person to have a prepared meal delivered to their home every day or to dine in a central place where meals are served to a group.

Transportation may be provided to persons who have no access to a vehicle or who are unable to drive in order for them to obtain medical services or to travel to and from community services.

If homemaker services can help elderly or disabled adults maintain their independence, they may receive them for up to six months. Homemakers provide instruction in areas such as meal preparation, budgeting, personal hygiene, and housekeeping.

Adult day care provides activities for and supervision of adults unable to care for themselves full-time. Usually, these adults are able to care for themselves some of the time, or they may have family members care for them part-time. This care is designed to prevent elderly or disabled adults from being isolated and, in many cases, from being institutionalized.

Respite care is similar in purpose to adult day care. There are instances where elderly or disabled adults are being cared for in a home by relatives or other persons. Respite care is designed to provide occasional relief from the responsibilities of constant care.

In FY 1988, Title XX services were purchased for 8,881 aged and disabled adults at a cost of $5,594,468. The number of persons served decreased 1.5 percent and there was a 4.5 percent increase in expenditures compared to FY 1987. Of the total amount, $2,397,538 was spent on chore services for 5,032 persons, $1,142,380 on meals for 3,515 persons, and $1,054,414 on transportation for 4,737 persons.

These services are funded by a federal block grant, which is supplemented by state general funds.

Adult Protective Services

Adult Protective Services' mission is to prevent or remedy neglect, abuse, or exploitation of the aged and disabled. The most commonly reported problems are of persons needing medical care; living in unsafe or unsanitary housing; being financially exploited; lacking in food, clothing, or shelter; or of disabled or incompetent adults being left unattended.

Throughout the state, protective service workers investigate reports and determine what services are necessary to alleviate or prevent further abuse. Workers help families to arrange for the provision of services, and they monitor the case to ensure that the situation improves. If needed, workers will coordinate with law enforcement authorities to obtain emergency intervention or with an attorney to initiate legal proceedings to protect the vulnerable person from further abuse or neglect.

In FY 1988, there were 1,963 reported cases of abuse or neglect. This is an increase of 19 percent over last year.

Disabled Person and Family Support Program

This program covers expenses for employed, disabled persons or for families who care for disabled relatives at home. Sometimes, a person who is disabled by disease or accident could continue to work and live independently, but certain nonmedical needs brought about by the disability make this impossible. Or, some families are unable to care for a disabled relative because of extensive nonmedical needs. The Disabled Person and Family Support Program covers a wide range of expenses including architectural modifications, the purchase of special equipment, attendant care, and the payment of nonmedical costs incurred during treatment.

In FY 1988, 187 persons received $179,284 worth of services. This is an increase of 23 percent in persons served and a 37 percent increase in expenditures over FY 1987.

This program is funded by state general funds.

Mental Retardation Services

The Department provides funding to programs for mentally retarded persons through the regional community based mental retardation programs. In FY 1988, 2,682 persons received services. The Title XX contribution was $4,731,037.

The Department uses Title XX Block Grant (federal) funds for these services.

ADMINISTRATION

The Nebraska Department of Social Services is an executive agency. Its Director is appointed by the Governor and approved by the Legislature. The Department is organized into eight divisions: a service delivery division, three program divisions, and four support divisions. The program and support divisions are located in a central office in Lincoln. The Client Services Delivery division is divided into eight geographic districts in which services are made available to eligible clients across the state. The Deputy Director, who is in charge of Client Services Delivery, and his staff are located in the central office. Also, the Department administers the Nebraska Center for Children and Youth (NCCY).

The Deputy Director and each Division Administrator report directly to the Director of the Department. The District Administrators who manage the eight districts report directly to the Deputy Director. (See Organization Chart on page 14).

In 1988, over 200,000 Nebraskans were served by the Department of Social Services. Program assistance is provided by the Department's three program divisions: Public Assistance and Food Programs, Human Services, and Medical Services.

The Public Assistance Division administers Aid to Dependent Children; Food Stamps and Food Distribution; State Disability and State Supplement Assistance for the Aged, Blind, and Disabled; Energy Assistance; Job Support; and Refugee Resettlement.

Services for children and families under Title XX, Title IV-B, PL 26-272, and the Community Services Block Grant administration are within the Human Services Division.

Medical Services manages the Nebraska Medical Assistance Program (Medicaid) pursuant to Title XIX of the Social Security Act, the Medically Handicapped Children's Program, and Title XX Services to the Aged and Disabled.

DIRECTOR'S OFFICE

The Director's Office consists of three areas: the Director of the Department and support staff, the Assistant to the Director, and Personnel and Training.

The Director, who reports to the Governor, administers the Department as provided by law. The support staff provides assistance to the Director as requested.

The Assistant to the Director under the supervision of the Director exercises administrative oversight in several areas. These areas include the following: management of the departmental planning processes, coordination of planning efforts with other agencies, oversight of the Nebraska Center for Children and Youth, and the facilitation of processes through which administrative conflicts are resolved.

Personnel and Training provides salary and benefit administration, labor negotiations, grievance resolution, recruitment and selection activities, staff development training, coordination of media contacts, and public information dissemination.

CLIENT SERVICES DELIVERY

With 1,296 staff located in 66 different local offices, Client Services Delivery is the largest division in the Department. Each District Administrator is responsible within his/her district for the provision and administration of all department programs. Seven of the eight districts encompass a multi-county area, with Lincoln/Lancaster being the exception. (See Map on page 19). The District Administrators, who manage the District Office itself, are assisted by sixteen Local Office Administrators, who are responsible for providing programs and implementing policy within their designated geographic areas.

Client Services Delivery has a staff of six located in the central office to assist the Deputy Director in the coordination of administration, program improvement and implementation, and resource development and allocation issues.

Four principles guide the activities of Client Services Delivery:

1. Treat each client with respect and dignity.
2. Keep services fully accessible to clients.
3. Offer the full range of services statewide.
4. Respond in a timely manner to the fluctuating demands for service.

PUBLIC ASSISTANCE AND FOOD PROGRAMS

The division of Public Assistance and Food Programs is divided into three units: Public Assistance I, Public Assistance II, and Food Programs.

Because of the large number and diversity of programs, Public Assistance is divided into two groups. Both groups are responsible for project planning and policy interpretation and development.

Public Assistance I includes the following programs: Aid to Dependent Children; Aid to the Aged, Blind, and Disabled; Medicaid Eligibility; Low-Income Energy Assistance; and State Disability.

Public Assistance II consists of the following programs: Job Support, Refugee Assistance, Emergency Assistance, Foster Care Income Maintenance, and income maintenance training for local office staff.

The Food Stamp unit is responsible for the following programs: Food Stamps, Food Distribution, and Special Distribution Program. In addition to these programs, this unit directly administers the food commodity distribution to Nebraska's schools and other public agencies.

MEDICAL SERVICES DIVISION

The Medical Services division includes three major units: Medical Programs, Operations, and Special Services for Adults and Children.

The Medical Programs Unit is accountable for the following activities:

Primary Care is responsible for policy formulation and implementation of the Medicaid Program, provider relations, training providers and local office staff, approving and/or monitoring all payments.

Psychiatric Services is accountable for mental health services offered by physicians, institutions, and allied mental health professionals. Also, this unit supervises the provision of medical services to state wards.

The Medicaid Drug Program develops and implements policy, trains providers and staff, and monitors the program for abuse and overutilization. A systems component monitors clients' medical treatment profiles for possible abuse.

The Operations Unit administers the following functions:

The Surveillance and Review (SUR) section of this unit is responsible for the SUR subsystem of the Medicaid Management Information System (MMIS). SUR provides comprehensive health care delivery and utilization data for program management. In addition, it monitors the patterns of practice by providers and the patterns of utilization by clients for possible abuse or fraud. If a situation with criminal intent arises, the case is referred to the appropriate law enforcement authorities.

This unit is responsible for the annual System Performance Review (SPR), which insures the documented use of the subsystem meets federal requirements, and for the Claims Processing Assessment System (CPAS), which samples cases for eligibility and claims processing.

The Long-Term Care section is responsible for Medicaid clients in long-term care facilities (nursing homes) and for in-home services for Medicaid eligible clients. This section is accountable for the administration and enforcement of all federal regulations relating to long-term care facilities. Staff review clients to ensure that they are properly placed and receiving appropriate care.

The Special Services for Adults and Children Unit is accountable for the following activities:

It plans, develops, implements, coordinates, and monitors purchased and staff provided services for aged and disabled persons under the Social Services Block Grant.

This unit is responsible for two Medicaid home- and community-based waivers. One waiver provides services to persons with mental retardation, and the other provides services to aged persons and disabled children and adults. Also, this unit is responsible for targeted case management under Medicaid.

The Disabled Persons and Family Support Program, which reviews all cases of disabled adults and children to assure they are receiving appropriate services, is administered by this unit. Also, this program develops and implements rules and regulations for adult family homes, as well as monitoring them. This program attempts to provide services in a manner that will enable aged and disabled persons to remain in independent living as long as possible, prevent unnecessary institutionalization, and prevent and remedy abuse and neglect of incompetent and disabled adults.

The Medically Handicapped Children's Program (MHCP) provides medical evaluation and specialized medical care for children with certain crippling conditions that pose a financial hardship to their families. The objectives of this program include the timely identification of medical needs, provision of appropriate services, and referral services for care not covered by MHCP.

HUMAN SERVICES DIVISION

The Human Services Division is composed of three units: Family and Child Welfare, Family Support Services, and the Training Unit.

Family and Child Welfare plans, develops, implements, and monitors programs and policies of welfare services for families and children. These services include Child Protective Services, Foster Care, and Adoption. Also, this unit is responsible for the Department's Permanency Planning Review System, which provides for six-month reviews of all state wards in out-of-home care.

Family Support Services plans, develops, implements, and monitors programs and policies of support services for families. These services include day care, homemaker and transportation services, domestic violence services contracted through community projects, and the licensing of early childhood programs.

The Training Unit plans, develops, and conducts or contracts for the provision of training related to human services programs.

ADMINISTRATIVE SERVICES DIVISION

This division consists of three units: Client Payments and Claim Processing, Administrative Support, and Information Systems.

Client Payments and Claims Processing is responsible for processing most automated payments. This includes the operation of the following automated systems: Medicaid Management Information Systems (MMIS), Client Eligibility System, Title XX—Social Service System, Child Support Enforcement System, Food Stamp System, Food Distribution System, and the Licensing and Energy Assistance Systems. Payments are processed for the following programs: Medicaid, Aid to Dependent Children, State Supplement, State Disability, Foster Care, Social Services, Child Support Enforcement, and Low Income Energy Assistance.

Administrative Support is responsible for providing supportive services in the areas of graphics/form design, purchasing, mail services, records management, facility services, word processing, manual review, coordination and issuance of departmental policy, and office systems support.

Information Systems administers the Department's computer resources. This unit provides support in such areas as feasibility studies; system design and development; system maintenance; equipment acquisition, installation, and maintenance; and system project management. Other responsibilities are as follows: developing the Department's data processing budget, monitoring data processing expenditures, and representing the Department in the data processing area with other public and private entities.

RESEARCH AND FINANCE DIVISION

The Research and Finance Division consists of two units: the Research and Statistics Unit and the Finance and Accounting Unit.

Research and Statistics compiles and submits all (approximately 360) federal reports, provides management information for policy decisions, prepares fiscal impact statements on proposed legislation, analyzes the impact of policy changes, prepares the Department's budget request, monitors agency expenditures, prepares the annual report, selects quality control (QC) samples, and provides an analysis of QC results. Also, analysts in the unit draft speeches and articles, develop surveys, undertake special studies, and write many of the Department's presentations.

Finance and Accounting manages the agency's accounting system and the claiming of federal funds. This unit manages the distribution of child support collections, processes expense vouchers, administers the the cost allocation plan and the cost allocation time study (which is used to allocate administrative cost and is the basis of claiming federal funds for administrative costs), and calculates nursing home and hospital reimbursement rates. Additionally, they handle the financial accounts of children who are state wards, fulfill federal reporting requirements, and insure the required audits are completed.

ENFORCEMENT SERVICES DIVISION

The Enforcement Services Division's principal duties are to review, monitor, and enforce various activities. These responsibilities are divided between four separate units: Child Support Enforcement, Long-Term Care Audits, Program Evaluation and Review, and Foster Care Licensing.

Child Support Enforcement assists individuals, courts, and prosecutors in the location of absent parents, the establishment of paternity, and the establishment and enforcement of support obligations owed by absent parents to minor children. Pilot projects with specialized state staff serve seventeen Nebraska counties in child support enforcement. Computer matches of absent parent information made with the Internal Revenue Service and the state Revenue and Labor Departments enable income tax refunds and unemployment benefits to be intercepted for delinquent child support obligations. Future efforts to increase child support collections will center on automatic income withholding of employment income from individuals with delinquent, court-ordered child support and an expanded use of automated data for parent location and paternity establishment.

Long-Term Care Audits examines nursing home costs to ensure that their costs are claimed in accordance with state and federal regulations.

Program Evaluation and Review undertakes federally mandated quality control reviews of ADC, Medicaid, and Food Stamps eligibility and payment determinations. The results of these reviews are analyzed to determine the types and causes of errors and possible corrective action. The goal of this operation is to ensure uniform and correct treatment for clients statewide and to avoid federal fiscal penalties levied when federal standards are exceeded.

Foster Care Licensing handles all foster care licensing as mandated by state statute.

LEGAL SERVICES DIVISION

The Legal Services Division has responsibility for all the legal matters of the Department. Staff attorneys provide legal advice and service to all of the Department's districts and divisions. These services involve interpreting federal law and federal regulations, state statutes, and the administrative rules and regulations of the Department. Additionally, this division drafts contracts, regulations, and legislation. Also, the attorneys assist the Attorney General's Office with litigation involving the Department. The Legal Services Division conducts hearings for applicants and recipients who appeal decisions made regarding benefits. Hearings are conducted for providers of medical services who appeal rate computations or subsequent audit adjustments. Additionally, appeal hearings are conducted for persons who appeal decisions made regarding their entitlement to licenses in those categories administered by the Department including child care, foster care, child-placing agencies, group homes, and day care homes. Hearings are conducted regarding suspected cases of food stamp fraud.

Department attorneys assist in the investigation and preparation of fraud cases for prosecution by county attorneys, or, if possible, civil recoupment of overpayments where feasible. The division's Special Investigative Unit has primary responsibility for investigating cases of suspected client fraud or program abuse.

The attorneys assist in the promulgation of regulations in order to insure that the requirements of the Administrative Procedures Act and any federal requirements are met. A child support enforcement component operates within this division under a contract with the Attorney General's Office. These attorneys do direct child support enforcement and paternity establishment work exclusively. Two of them are located in Omaha and the others work in Fremont, Norfolk, and Hastings.

THE NEBRASKA CENTER FOR CHILDREN AND YOUTH

The Nebraska Center for Children and Youth (NCCY) is a facility for families who are unable to maintain their children at home or in foster care placement. The principal clients are children and youth who have been adjudicated as wards of the state. NCCY serves children and youth from across the state, and the main facility is located at 5903 Walker Avenue in Lincoln, Nebraska.

Outreach programs are located in Seward, Columbus, Bellevue, Auburn, as well as Lincoln.

The goal is that each child placed at NCCY be served in the least restrictive environment possible, while facilitating reunification with their families.

There are three program models used by NCCY:

Community I is a campus based program that uses three living units. This is the most structured program. It is designed for youth who require the most restrictive and intensive level of care and treatment.

The Family and Community Services (FACS) program is designed for youth at high risk of more restrictive placements or of returning to psychiatric settings. FACS provides both a residential group facility in Lincoln and nonresidential technical assistance to case mangers.

Community III is a program designed to meet the needs of youth who can remain in the community, but who are not yet ready to live in their own homes. This program uses seven group homes for living facilities. Included under this program is the Independence Preparation Program (IPP) and a preventive services program. In the IPP program youth live in their own apartments in Lincoln, and they are monitored by NCCY staff. Under IPP youth acquire those skills that will insure a successful independent placement and family therapy to help the youth reconcile differences with his/her family. Preventive services is a nonresidential program designed to provide a combination of nonresidential services to prevent residential placement.

In FY 1988, 207 youth and families were served by NCCY. Of these, 148 were served in residential placement with the remaining 59 receiving nonresidential services such as education, emergency placements, family services, therapeutic recreational services, and/or technical assistance.

VOLUNTEERS

Currently, the Nebraska Department of Social Services has over 2,000 volunteers working with the Department.

In the fiscal year ending June, 1988, individuals volunteered 98,923 hours of services. The monetary benefit of that to the Department equals $642,999 (average wage plus benefits). In addition, volunteer donations of cash, goods, and services totaled $133,879. These two totals provided an overall benefit to the Department of $776,878.

*Expenditures are total dollars paid for the year. Persons are average monthly unduplicated recipients. Within a month, a person is counted only once regardless of the number of times the service is utilized and counted only once in the total regardless of the number of different services received.

**Less than one average monthly person

***Waiver and Case Management expenditures are not included.
